## **Daimyos Conquest:**

*Daimyo's Conquest* William Morell, 1985      **In the Name of the Battle against Piracy**, 2018-03-12 In the Name of the Battle against Piracy discusses antipiracy campaigns in Europe and Asia in the 16th 19th centuries Nine contributors argue how important antipiracy campaigns were for the establishment of a colonial state because piracy was a threat not only to maritime commerce but also to its sovereignty Battle against piracy offered a good reason for a state to claim its authority as the sole protector of people and to establish peace order and sovereignty In fact as the contributors explain the story was not that simple because states sometimes attempted to make economic and political use of piracy while private interests were strongly involved in antipiracy politics State formation processes were not clearly separated from non state elements Contributors are Kudo Akihito Satsuma Shinsuke Suzuki Hideaki Lakshmi Sabramanian Ota Atsushi James Francis Warren Fujita Tatsuo Murakami Ei and Toyooka Yasufumi      *War In The Early Modern World, 1450-1815* Jeremy Black, 2020-09-23 This book presents a collection of essays charting the developments in military practice and warfare across the world in the early modern period It also considers the nature and role of technological change and the relationship between military developments and state building      [Battle Stations!](#) Stephen Shapiro, Ken Nice, Mei Tsao, 2005 Describes ten fortifications ranging from an ancient Egyptian frontier fort on the Nile to Fort Drum in the Philippines during World War II      [Military Thought of Asia](#) Kaushik Roy, 2020-11-04 *Military Thought of Asia* challenges the assertion that the generation of rational secular ideas about the conduct of warfare is the preserve of the West by analysing the history of ideas of warfare in Asia from the ancient period to the present The volume takes a transcontinental and comparative approach to provide a broad overview of the evolution of military thought in Asia The military traditions and theories which have emerged in different parts of Eurasia throughout history are products of geopolitics and unique to the different regions The book considers the systematic and tight representation of ideas by famous figures including Kautlya and Sun Tzu At the same time it also highlights publications on military affairs by small men like mid ranking officers and scattered ideas regarding the origin nature and societal impact of organised violence present in miscellaneous sources like coins inscriptions paintings and fictional literature In so doing the book fills a historiographical gap in scholarship on military thought which marginalises Asia to the part of cameo and historicises the evolution of theory and the praxis of warfare The volume shows that the East has a long unbroken tradition of conceptualising war and its place in society from the Classical Era to the Information Age It is essential reading for those interested in the evolution of military thought throughout history particularly in Asia
