Peterman, **Platform 10** ,2012 Since the 1980s Chicago based artist Dan Peterman has explored the intersection of art
and ecology through a practice that is more in line with the poetic than the didactic Peterman is a socially motivated artist
who has embraced a wide variety of formal and situational strategies to critically address the exhaustion of resources in our
society He uses a range of materials including recycled plastic and metals as well as organic and post consumer waste in his
sculptures installations and public art projects For his project at deCordova Peterman will site his sculpture Love Podium in
the Museum Entrance Plaza as a functional platform for spoken performances As part of a slate of programming proposed by
our museum audience speakers will activate the Love Podium by simultaneously reading texts that represent opposing views
on a single topic Installed just before the 2012 Presidential election the podium presents and problematizes this divisive age

Art,2001-01 Since the 1960s many artists have incorporated ecological concerns into their work an endeavor that has
required new strategies in art making To explore recent American manifestations of these interests the David and Alfred
Smart Museum commissioned new projects from artists Mark Dion Peter Fend and Dan Peterman each focusing on
interrelationships between particular organisms human beings and a specific group of sites a museum building a river
landscape and a university campus The results exhibited at the Smart Museum during the summer of 2000 evoke the varied
scales from the microscopic to the global at which human actions affect the environment This catalog documents each of the

author Liane Lefavre has developed a theoretical model for tackling playgrounds as an urban strategy She starts with a
historical overview of play and the ludic in art architecture and urban design focusing particularly on postwar playgrounds
realized in Amsterdam as joint ventures between Aldo van Eyck Cornelis van Eesteren and Jakoba Mulder The architecture

firm D ll Atelier voor Bouwkunst explored the possibility of applying the model in two urban redevelopment areas in Rotterdam Oude Westen in the inner city and Meeuwenplaat in Hoogvliet an outlying postwar district refining it into a practical design strategy The second part of the book provides a refreshing new look at play in a picture essay with reference images illustrating play as an urban phenomenon Ground Up Cityplaces the playground high on the agenda as an urban design challenge It also shows how specifying a generic academic model for a particular situation can lead to a practically applicable design resource
