SOCIALIZED MEDICINE

In 1883, Prince Otto von Bismarck, Chancellor of Germany, initiated the first modern program of socialized medicine. It was called compulsory national health insurance.

Bismarck hoped communism. His motive in introducing socialized medicine in Germany was to buy the loyalty of the German masses as a means of keeping them from becoming communists. Bismarck adopted "nationalistic socialism to end international socialism" — to use his own words. To use other words, Bismarck was the first leader of a great nation to fight communism by adopting communism.

The German citizens paid more for their national compulsory health insurance than they had paid for private insurance before Bismarck came along — and they got less in return.

Bismarck's scheme failed miserably to provide better medical care for the people of Germany; but it did become an important feature of the German militaristic state; it helped pay the way for Hitler a generation later, and it furnished a pattern which practically every other nation in the West — including America — has experimented with.

England first started experimenting with socialized medicine in 1911. The experiment was a failure, as they always have been everywhere.

But government never retreats. When government wastes power and money from the people in order to protect their welfare and then makes matters worse for them, government always argues that it didn't have enough power and money to do enough protecting.

In England, for example, when Lloyd George's rather moderate experiment in the Bismarckian type of national health insurance was abandoned, the nation went all the way into communized medicine.

The National Health Program which became the law of England in July, 1948, is modeled on the Soviet system created by Lenin.
