## **Dangerous Breed:**

*Breed Differences in Dog Behavior* Renee Robinette Ha, Tracy L. Brad, James C. Ha, 2024-04-10 Humans have bred dogs for physical and behavioral characteristics for millennia. These efforts can have unintended side effects, however, which may be either advantageous or cause issues such as a predisposition to certain medical complaints or controversially behavioural issues. The scientific study of domestic dogs is still in its infancy but public demand for this information is at a record high as more and more pet owners seek to understand their canine family members. Focusing on the behavioral differences and tendencies that have arisen in different breed lines, this book explores, summarizes, and explains the scientific evidence on what breed can tell us about behaviour and crucially what it cannot. Providing a comprehensive and approachable view of the science behind breed-specific behaviors, this book gives dog enthusiasts from all professional and personal backgrounds a better understanding of why dogs do what they do and how we can improve our relationships with our canine companions. Covering genetics, phylogeny of canids, temperament, aggression, social behavior, and the history of dog breeding, it is an important read for researchers, students, veterinary practitioners, and animal behaviourists, as well as shelter staff, dog trainers, or anyone looking for a greater understanding of dog breed differences.

**Draft Dangerous Dogs (Amendment) Bill** Great Britain: Parliament: House of Commons: Environment, Food and Rural Affairs Committee, 2013-05-16 This report had endorsed draft laws to extend dangerous dogs offences to attacks on private property and on assistance dogs. But the MPs criticise the Government for failing to bring in wider measures including Dog Control Notices to tackle out-of-control dogs. MPs also endorse the proposed amendment to the Dangerous Dogs Act 1991 making attacks on private land the same as attacks on public land. The current law makes it impossible to bring criminal charges against an owner whose dog attacks someone in a private place such as a home. The Committee welcomed the proposal to enable action to be taken regardless of where a dog attack happens. The Committee agrees with the Government that the protection from prosecution should apply only when an attack takes place on a trespasser in the house, not in a surrounding area such as the garden or drive. However, measures taken by the owner to minimize the likelihood of their dog acting aggressively toward someone unexpectedly in such places should be taken into account by enforcement agencies and the courts. MPs fully support the measures to extend offences to those committed against an assistance dog such as a guide dog in the same way as if the attack were on a person. This reflects the significant consequences such attacks have on the daily lives of people who rely on assistance dogs. The Committee recommends that such offences should be extended to apply to any attack which injures a protected animal such as a horse or livestock.

**Animals in the City** Laura A. Reese, 2021-11-15. This book presents interdisciplinary research to examine the ongoing debates around nonhuman animals in urban spaces. It explores how we can better appreciate and accommodate animals in the city while also exploring the ecological health ethical and cultural implications of the same. The book addresses seven interrelated themes such as blurred boundaries between the human and the nonhuman the right of nonhuman species to the city interactions between the human and nonhuman animals the fabric of urban space human and nonhuman complex systems and collective welfare that forms the basis of a transspecies urban theory. It explains how a holistic understanding of the city requires that these blurred boundaries are acknowledged and critically examined. Chapters analytically consider the need to bring interspecies relationships to the fore to tackle questions of legitimacy and who has the right to the city. These also consider important intersections between the economic political social and cultural aspects of the urban experience. The research contained in this book focuses on the development of an urban theory that would eradicate the divide between humans and other species in cities and it depicts nonhuman animals as social actors that
