The Chemical Constitution of the Proteins R. H. a. Plimmer,2012-02 This historic book may have numerous typos and missing text Purchasers can download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1913 Excerpt THE LINKING TOGETHER OF AMINO ACIDS By the action of benzoyl chloride upon the silver salt of glycine Curtius in 1881 obtained in addition to the expected hippuric acid $C_6H_6COClH_2NCH_2COOH$ HCl C_6H_6CO $NHCH_2COOH$ two other acids of higher molecular weight One of these was hippurylglycine or benzoyl glycyglycine $C_6H_6COHNCH_2CO$ $NHCH_2COOH$ as was proved by the study of its salts its ethyl ester and amide and by its hydrolysis into hippuric acid and glycine It was the first definite compound known which contained two amino acid residues combined together The constitution of the other acid called the y acid could not be determined it had the formula $C_{10}H_{12}N_3O_4$ was soluble with difficulty in water and gave the biuret reaction It was obtained in larger quantities when hippuric ester was fused with glycine but under these conditions another compound benzoyl bisglycyl glycine was formed at

the same time so that in this way a series of compounds resulted each succeeding member containing a glycol NH₂ CH₂ CO group more than the preceding one Further investigations upon the constitution of these compounds were only carried out in 1904 by Curtius and Benrath who found that the γ acid from the analysis of its silver salt ester etc had the formula C₁₉H₂₄N₆O₆ and that it was benzoyl pentaglycol glycine C₆H₅ CO NH CH₂ CO 5 NH CH₂ COOH its ester being identical with the compound synthesised by Curtius and Wiistenfeld see below Two other compounds hippuryl glycine and benzoyl triglycolglycine were found to be formed by fusing together hippuric ester and glycine but not the previously isolated benzoyl bisglycol glycine Longer chains than the six membered γ acid are not believed by Curtius and Benrath The Chemical Constitution of the Proteins, Part 1 Robert Henry Aders Plimmer, 2015-09-20 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **Chemical Abstracts** ,1921 Chemical Constitution Jan Arnold Albert Ketelaar, 1960 *Calendar* Dalhousie university, 1884 Journal of the Chemical Society Chemical Society (Great Britain), 1891
