Cu, Zn, Pb, and Ag Deposits Bozzano G Luisa, 2012-12-02. Handbook of Strata Bound and Stratiform Ore Deposits Volume 6. Cu Zn Pb and Ag Deposits focuses on the characteristics, properties, origins and structures of Cu Zn Pb and Ag deposits. The selection first underscores a comparative review of the genesis of the copper lead sandstone type deposits, volcanic massive sulfide deposits and their host rocks and tectonic setting of some strata bound massive sulfide deposits in New South Wales, Australia. Discussions focus on tectonic setting of Cyprus type and Kuroko type strata bound massive sulfide deposits, development of some tectonic units in which strata bound massive sulfide deposits occur in the Paleozoic sequences of New South Wales, volcanic host rocks and interim summary of field and laboratory data. The text then ponders on Caledonian massive sulfide deposits in Scandinavia, Precambrian strata bound massive Cu Zn Pb sulfide ores of North America and geology of the Zambian Copperbelt. Concerns cover types of orebodies, structures of the Zambian Copperbelt, geology of representative deposits, general geological features and lithostratigraphical relations of the ores. The manuscript takes a look at the McArthur zinc lead silver deposits, Appalachian zinc lead deposits and tri state ore deposits. The selection is a dependable source of data for researchers wanting to study Cu Zn Pb and Ag deposits.

Manganese Mineralization Keith Nicholson, 1997. Manganese mineralization is diverse in occurrence, origin, mineralogy and geochemistry. This volume includes a review of the range of terrestrial Mn deposits and their relative abundance through geological time. Experimental and modelling approaches to Mn geochemistry and mineralogy can further aid our understanding of the formational and depositional processes involved and thereby our interpretation of deposit metallogenesis.
