*Chemistry for the Protection of the Environment 2* Lucjan Pawlowski, William J. Lacy, Christopher G. Uchrin, Marzenna R. Dudzinska, 2012-12-06 Over the past two decades this environmental conference series has emerged to become one of the major international forums on the chemical aspects of environmental protection. The forum is called Chemistry for the Protection of the Environment (CPE). The sponsors of this CPE series have included the Chemical Societies of Poland, France, Belgium, Italy, Egypt, and the U.S.A., the American Institute of Chemical Engineers, the American Society of Testing and Materials, the International Ozone Association, the United Nations Industrial Development Organization, the Ministries of the Environment of Poland, France, Belgium, and Italy, U.S. Agency for International Development, U.S. Environmental Protection Agency, more than twenty universities and institutes of higher learning, and five national academies of sciences. The first meeting in this series was organized by Prof. Pawlowski and Dr. Lacy in 1976 at the Marie Curie-Skłodowska University in Lublin, Poland. The conference dealt with various physicochemical methodologies for water and wastewater treatment research projects that were jointly sponsored by U.S. EPA and Poland.

Chemistry for the Protection of the Environment 4  
Robert Mournighan, Marzenna R. Dudzinska, John Barich, Marjorie A. Gonzalez, Robin K. Black, 2007-02-01 Chemistry for the Protection of the Environment 4 focuses on Environmental aspects of agricultural practices, Field characterization and quantification of chemical constituents, Fate of contaminants in the environment, environmental monitoring, Thermal treatment technologies, Remediation of contaminated sites, Wastewater treatment and sludge management, Environmental Security, Risk Assessment and Environmental Management. This volume is the proceedings of the first CPE conference in the new millennium and the thirteenth in a well-established series of conferences on Chemistry for the Protection of the Environment, first established in 1976. With support of the U.S. EPA, the series of conferences provides an opportunity for interdisciplinary exchange of ideas among international specialists from diverse fields and backgrounds on the chemical aspects of environmental protection. Over the years, the CPE conferences have gathered participants from more and more countries, and the scope of interests has been broadened. Held in Hilo, Hawaii, this was the first of these international conferences to take place in the United States. The Organizing Committee attracted a wide range of talented scientists and engineers to the conference who have useful ideas to contribute on how to clean our environment. Any pollution control or pollution cure action today must take into consideration not only one element of the environment like water, air, or soil, but also proper environmental handling and related problems. In all cases, chemical processes play a highly significant role. In recent years, there has been a shift from wastewater technologies and pollutant monitoring problems to environment management and solid wastes issues. This book provides a forum for chemical scientists and engineers who are dedicated to the worthy mission of making a cleaner, healthier world for everyone. The central goals of Chemistry for the Protection of the Environment are to improve technology transfer and scientific dialogue, thereby leading to better comprehension of and
