important facts to be observed One of the aims of all laboratory work is to arouse the student's enthusiasm for finding things out by experiment To encourage this spirit additional experiments which are marked Optional have been included These may well be used to give elasticity and variety to the laboratory work as well as to emphasize the close connection between chemistry in the school laboratory and chemistry in the household in the factory or on the farm The introductory paragraphs are intended to give the setting of the experiment and to indicate its significance These may well be amplified by the teacher in the oral discussion preceding each experiment It is expected that the instructor will select those experiments which meet the needs of his class Probably an average class of beginners in chemistry can in one school year perform successfully not more than forty of these experiments It is far better to have a small number carefully done well written up and thoroughly understood than to rush through many carelessly About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
