Chemistry Of Cationic Polymerization:

The Chemistry of Cationic Polymerization P. H. Plesch, 2016-01-11 The Chemistry of Cationic Polymerization covers the fundamental aspects of organic chemistry that provide significant insights into the many facets of cationic polymerization processes and products Each chapter deals with individual and groups of monomers Considerable chapters examine the chemistry of oxygen compounds Other chapters describe the techniques for cationic polymer analysis and detection This text also considers sulfur compounds particularly their polymerizations by radical and anionic mechanisms The remaining chapters explore the polymerization and products of carbonium ions related organic reactions and comparison with radical and anionic polymerizations as well as the conspectus of kinetics and mechanism This book is of great value to organic and polymer chemists

Cationic Polymerizations Krzysztof Matyjaszewski, 1996-04-26 This unified presentation of cationic polymerization discusses initiation propagation transfer and termination in cationic polymerizations of alkenes and heterocycles It also elucidates the mechanisms of the reactions involved in all carbocationic and ring opening polymerizations It is written by internationally acclaimed experts in their respective fields

Ionic Polymerizations and Related Processes Judit E. Puskas, Armin Michel, Shahzad Barghi, 2012-12-06 In Ionic Polymerization and Related Processes internationally recognised academic and industrial researchers discuss and debate the latest developments in the field The major focus is on cationic polymerizations but related anionic and controlled radical processes are also discussed

Macromolecules H.G. Elias, 2013-11-11 The second edition of this textbook is identical with its fourth German edition and it thus has the same goals precise definition of basic phenomena a broad survey of the whole field integrated representation of chemistry physics and technology and a balanced treatment of facts and comprehension The book thus intends to bridge the gap between the often oversimplified introductory textbooks and the highly specialized texts and monographs that cover only parts of macromolecular science The text intends to survey the whole field of macromolecular science Its organization results from the following considerations The chemical structure of macromolecular compounds should be independent of the method of synthesis at least in the ideal case Part I is thus concerned with the chemical and physical structure of polymers Properties depend on structure Solution properties are thus discussed in Part II solid state properties in Part III There are other reasons for discussing properties before synthesis For example it is difficult to understand equilibrium polymerization without knowledge of solution thermodynamics the gel effect without knowledge of the glass transition temperature etc Part IV treats the principles of macromolecular syntheses and reactions

Fundamentals Of Polymerization Broja Mohan Mandal, 2012-11-30 Over the last twenty years the field of the

chemistry of polymerization witnessed enormous growth through the development of new concepts catalysts processes etc Examples are non classical living polymerizations group transfer polymerization living carbocationic polymerization living radical polymerization and living ring opening metathesis polymerization ROMP new catalysts metallocenes and late transition metal catalysts for stereospecific polymerization Schrock and Grubbs catalyst for ROMP among others and new processes such as miniemulsion microemulsion polymerization and dispersion polymerization in polar solvents Apart from the developments in the chemistry of polymerization methods have been developed for the evaluation of highly reliable rate constants of propagation in radical as well as cationic polymerization All these have revolutionized the field of synthetic polymer chemistry In the book fundamentals of both the new and old polymerization chemistry have been dealt with The new chemistry has been given nearly equal space along with the old *The Chemistry of Cationic Polymerization.
