## **Developmental Math:**

*Developmental Mathematics for College Students* Robert Blitzer, 2016-02-25 Gets them engaged Keeps them engaged Bob Blitzer's use of realistic applications instantly piques students' curiosity about the presence of mathematical concepts in the world around them. These applications are apparent throughout the entire program from his relatable examples, friendly writing style, and thought-provoking features in the textbook to the enhanced digital resources in the MyMathLab course. Blitzer pulls from topics that are relevant to college students, often from pop culture and everyday life, to ensure that students will actually use their learning resources to achieve success. With an expansion of the series to now include a Developmental Math all-in-one text with content spanning prealgebra through intermediate algebra and with an enhanced media program accompanying this revision, developmental students at all levels will see how math applies to their daily lives and culture. Also available with MyMathLab, MyMathLab R is an online homework tutorial and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them absorb course material and understand difficult concepts. **Developmental Mathematics** Julie Miller, Molly O'Neill, Nancy Hyde, 2023 Julie Miller Molly O'Neill and Nancy Hyde originally wrote their developmental math series because students were entering their College Algebra course underprepared The students were not mathematically mature enough to understand the concepts of math nor were they fully engaged with the material The authors began their developmental mathematics offerings with intermediate algebra to help bridge that gap This in turn developed into several series of textbooks from Prealgebra through Precalculus to help students at all levels before Calculus

*Innovations in Developmental Math* Cecilia Le, Kimberly R. Rogers, Janet Santos, 2011 Nearly 60 percent of incoming community college students are unprepared for college level work and must take at least one pre college developmental course usually in math or English before enrolling in any credit bearing classes toward a degree Within developmental education students are most likely to need help with mathematics and students who enter community college needing to take developmental math fare the worst in terms of outcomes making this an issue that deeply affects students Lack of readiness for college math is as damaging as it is widespread Students are more likely to fail developmental mathematics than any other course in higher education according to the Carnegie Foundation for the Advancement of Teaching Thus it is not surprising that many students referred to developmental math choose to bypass such courses and services without knowing the detrimental consequences of this decision on their overall educational goals This brief looks at three community colleges that have made significant investments in programs to improve student success in developmental math These colleges are spotlighted for their implementation of the varied approaches to developmental math described above and for their ability to demonstrate outcomes for their students The community colleges featured in this brief are 1 Florence Darlington Technical College in South Carolina 2 Delaware County Community College in Pennsylvania and 3 Chaffey College in California Contains 4 tables and 11 endnotes

succeed and those who do not have access to a reform due to differential access constraints Throughout the workshop participants also explored promising approaches to bolstering student outcomes in mathematics focusing especially on research and data that demonstrate the success of these approaches deliberated and discussed barriers and opportunities for effectively serving all students and outlined some key directions of inquiry intended to address the prevailing research and data needs in the field This publication summarizes the presentations and discussion of the workshop
