International Journal of Comparative and Applied Criminal Justice ,1992 American Book Publishing Record ,1997-05 **Monographic Series** Library of Congress,1978 Controlling Illegal Drugs Sandro Segre, This study presents and compares the drug policies in use in the United States Sweden and Italy to limit the use and abuse of substances such as marijuana hashish cocaine heroin and amphetamines It also focuses on attempts to suppress the traffic in these drugs A primary objective of Segre s work is theoretical to evaluate and explain by means of a comparative method applied to the study of individual cases the respective level of success of these policies measured according to conventional criteria The aim of this comparison between Swedish drug policies a positive case and U S and Italian policies negative cases is to evaluate the effect of these policies on drug use Segre comes to the general conclusion that there is a causal relationship between drug use and drug control This is deduced from the association between Swedish policies and the limited diffusion of narcotics in Sweden on the one hand and from the association between U S and Italian policies and the wide diffusion of these substances in the United States and in Italy on the other hand This study does not aim to give a complete explanation of the high or low use of narcotics But what Segre does say is that the level of drug consumption could be a consequence of other causes which are considered here not as independent variables but on the contrary as intervening variables The literature in this field needs to dwell particularly on social and psychological causes Examples are the influence of parents and peers attitudes toward the use of drugs or abstention from them the positive or negative images that persons have of themselves and the possibility or rather the difficulty of establishing significant forms of interpersonal communication This is a modest serious contribution to the vexing issue of the causes of drug use in advanced societies *Major Reforms of the Swedish Education System, 1950-1975* Arnold J. Heidenheimer,1978 **Abstracts on Criminology and Penology** ,1977 Bimonthly Abstracts of journal articles and monographs Covers material from psychiatric literature as well as from criminological sources Entries arranged in classified order Author subject indexes Major Criminal Justice Systems George F.
