experience among British veterans and for what they tell us about the cultural identity of military life writing in post war British society

Among The Dead Cities A. C. Grayling, 2009-05-26 In *Among the Dead Cities* the acclaimed philosopher A C Grayling asks the provocative question how would the Allies have fared if judged by the standards of the Nuremberg Trials Arguing persuasively that the victor nations have never had to consider the morality of their policies during World War II he offers a powerful moral re examination of the Allied bombing campaigns against civilians in Germany and Japan in the light of principles enshrined in the post war conventions on human rights and the laws of war Grayling begins by narrating the Royal Air Force s and U S Army Air Force s dramatic and dangerous missions over Germany and Japan between 1942 and 1945 Through the eyes of survivors he describes the terrifying experience on the ground as bombs created inferno and devastation among often unprepared men women and children He examines the mindset and thought process of those who planned the campaigns in the heat and pressure of war and faced with a ruthless enemy Grayling chronicles the voices that though in the minority loudly opposed attacks on civilians exploring in detail whether the bombings ever achieved their goal of denting the will to wage war Based on the facts and evidence he makes a meticulous case for and one against civilian bombing and only then offers his own judgment Acknowledging that they in no way equated to the death and destruction for which Nazi and Japanese aggression was responsible he nonetheless concludes that the bombing campaigns were morally indefensible and more that accepting responsibility even six decades later is both a historical necessity and a moral imperative

Bombs, Cities, and Civilians Conrad C. Crane, 1993 As the might and capabilities of American airpower have grown during the last 60 years so has the controversy about its use in the intentional and indiscriminate wartime bombardment of civilians In *Bombs Cities and Civilians* Conrad Crane maintains that for the most part American airmen in World War II remained committed to precision bombing doctrine Instead of attacking densely

populated urban areas simply to erode civilian morale Army Air Forces adhered to a policy that emphasised targeting key industrial and military sites He demonstrates that while the British Germans and Japanese routinely conducted indiscriminate aerial bombardment of enemy cities American airmen consistently stayed with daylight raids against carefully selected targets especially in Europe Daytime precision missions were usually far more dangerous than night area attacks but such Army Air Forces tactics increased bombing efficiency and also reduced the risk of civilian casualties Military history journal ,1995 **The Journal of Historical Review** ,1998 *The Greatest Story Never Told* Michael K.
