New Concepts in Diabetes and Its Treatment F. Belfiore, C. E. Mogensen, 2000-03-16 Diabetes mellitus and its complications are conditions of growing importance from both the clinical and epidemiological standpoint Diabetes has life threatening complications affecting several organs and systems with increased risk for ocular renal cardiac cerebral nervous and peripheral vascular disease In many developed countries and in special ethnic groups diabetes causes premature disability and mortality It is therefore mandatory for both the specialist and the practitioner to be acquainted with the pathophysiological mechanisms clinical manifestations and above all therapy of diabetes mellitus Recent data showing that control of hyperglycemia may prevent the onset or slow down the progression of complications point to the importance of appropriate and efficacious treatment Indeed the aim of this book is to serve as a tool for physicians giving the latest diagnostic aspects and pathophysiological mechanisms to enable a better understanding of the various facets of modern diabetes management Presented in a clear and easy to read form this book will be useful to all physicians interested in the management of diabetic patients by providing them with a simple yet updated source of information on the new concepts in diabetes and its treatment

Diabetes Shamim I. Ahmad, 2013-04-12 Diabetes is a complex disease and is also one of the most common It is very difficult to reach an accurate estimate for the global prevalence of diabetes since the standards and methods of data collection vary widely in different parts of the world In addition many potential sufferers are not included in the count because according to an estimate about 50% of cases remain undiagnosed for up to 10 years However according to an estimate for 2010 globally there are about 285 million people amounting to 6.4% of the adult population suffering from this disease This number is estimated to increase to 439 million by 2030 if no cure is found The general increase in life expectancy leading to an ageing population and the global rise in obesity are two main reasons for the increase With the basic platform set Editor presents his views and advice to the readers especially to diabetic patients suffering from T2DM on the basis of his observations and information collected from other
