**Handbook of Fundamentals of Modern Vocational Education**  
 Felix Rauner, 2024-07-25 This book traces the foundations for the new interplay between work technology and education. It shows how the guiding idea of co-designing the world of work has influenced vocational training planning and research as well as the design of vocational training processes. The author delves into the time period from the beginning of the 1980s to the present day in the 21st century and showcases knowledge from numerous national and international projects on vocational education. This book serves as a major reference book for researchers, practitioners, policy makers and other stakeholders alike. The basis of the English translation of this book from its German original manuscript was done with the help of artificial intelligence. A subsequent human revision of the content was done by the author.
