Diagnostic Function Tests In Chemical Pathology:

Diagnostic Function Tests in Chemical Pathology P.T. Lascelles, D. Donaldson, 2012-12-06 This book is written for hospital doctors nurses biochemists medical laboratory scientific officers and phlebotomists involved with the biochemical investigation of patients It is hoped also that general practitioners and medical students will find it of help Whilst the vast majority of biochemical tests assess the level of constituents in blood and urine at a given point in time an important additional parameter is the assessment of physiological reserve function by means of loading tests prolonged fasting exercise and clearance studies The protocol and interpretation of response of each of these stress tests form the main basis of the text An attempt has been made to be reasonably comprehensive in the range of tests described hence not only have some rather older ones been retained but also some very recently introduced ones included It is appreciated that practice varies widely from laboratory to laboratory with respect to protocol sample collection methodology and quotation of reference ranges and no doubt also from clinician to clinician particularly regarding interpretation of results In paediatric work micromethods will demand much smaller volumes of blood than those stated here which relate generally to adult medicine The account therefore must be seen as a guide to practice rather than as a recipe it is in no way an attempt to standardise procedures which depend on the local requirements

Cases in Chemical Pathology R. N. Walmsley, L. R. Watkinson, H. J. Cain, 1999 This book is the fourth edition of a highly regarded text which was first published in 1988 It introduces the reader to the interpretation of routine laboratory biochemical test results and covers all aspects of interpretative chemical pathology including reproductive endocrinology which was not covered previously The approach is based on case material from the authors laboratory and employs algorithms and similar aids for interpretation The material is structured so that it is comprehensible to beginners as well as being useful for the more experienced practitioners The envisaged audience is medical undergraduates general practitioners clinical biochemists and laboratory technicians

Scientific Foundations of Biochemistry in Clinical Practice David L.
