## **Dialectical Social Science In The Age Of Complexity:**

**Dialectical Social Science in the Age of Complexity** Ian Trevor King, 2001 This study places dialectical thinking theory and method on a solid scientific footing with respect to the contemporary sciences of holistic relationism and offers a competing even superior philosophy of social science to the mainstream version of positivistic behaviourism It also indicates ways in which a dialectical holistic relational social science will help to shape a more democratic humane style of politics and public policy It subjects mainstream social science to wholesale reorientation and in doing so offers a valid prescription for a post positivistic post behaviourist social science that is scientifically grounded Co-opting Culture Garrick B.

Harden, Robert Carley, 2009-06-16 Co-opting Culture Culture and Power in Sociology and Cultural Studies represents a collection of new scholarship on culture from the social sciences and from work done under the rubric of cultural studies Working from the idea that Sociology and Cultural Studies have developed distinct and valuable toolkits for understanding culture the editors have brought together a collection of essays that address the ways in which the cultures around race sex and gender are mediated through or intersect with politics society and economy Some essays deal directly with the theoretical nature of this mediation while others adopt these theoretical approaches to investigate specific cultural objects or communities In doing so these essays call attention to the particularities of form that constitute a kind of cultural logic around the objects under consideration Complexity Thinking: Science in the Age of Alternative Truths Cornelis Pieter

Pieters, 2024-04-26 Many scholars agree that we are currently living in post ideological times and that the role of religion and social ideology has become increasingly limited as a means to organise society Some even talk of a post truth era as truth itself has become suspect and public debate has become infected with terms such as fake news and alternative truths In fact in many scientific areas the notions of truth objectivity and fact are being questioned and are often even considered instruments that aim to perpetuate relationships of power of elites This book aims to take a position in these debates by looking at the often implicit associations behind truth objectivity and fact By taking a complexity informed dialectical approach a more encompassing understanding of these concepts can be developed that both respects the formidable achievements of science while being sensitive to the critique that has been raised most notably by postmodern thought

Sawchuk, 2015-04-08 Emerging Approaches to Educational Research explores four significant framings to do with research on education and learning across the lifecourse It discusses how they are being taken up and utilised as well as their possibilities and limitations complexity science cultural historical activity theory CHAT actor network theory ANT spatiality theories **Social Science and Complexity** Ian Trevor King, 2000 The various tasks of this book are handled in four parts

In Part One The Natural Sciences and the Social Sciences two related questions will be addressed in order to contextualise

the whole book's relevance and the legitimacy of the questions it asks and of the points it wishes to make. In five chapters in Part Two *The Holistic Relational Sciences* I lay out the basic premises of the four dissenting sciences: quantum holography, chaos theory, neo-evolutionary theory, and complexity theory, self-organised criticality, as well as demonstrate their shared holism in as non-technical a jargon as possible and with special reference to the kinds of substantive and methodological interests that the social sciences tend to share. Part Three *Dimensions of Holistic Relational Social Science* consisting of nine chapters extends the discussion in Part Two by dealing with specific elements of the holistic relational sciences in more detail and by beginning to demonstrate how they apply to the social sciences as presently constituted and how they influence the debates which currently exercise the minds of both methodologists and philosophers in the social sciences. The final three chapters which make up Part Four *Holistic Relational Social Science: Politics and Economics* as already hinted at above return to the subject matter first raised in Chapter Two that a holistic relational science will necessarily lead to an alternative and complementary notion of politics and public policy.

*Dialectics as Mode of Thought and Method in History* Manolis Dafermos, 2025-11-24 This book provides a thorough and panoramic exploration of dialectics, presenting it as both a mode of thought and a method of inquiry deeply embedded in the history of human thought. Rather than treating dialectics as a fixed system of abstract principles, the book underscores both its dynamic character and its historical development. Through careful examination of pivotal moments in dialectics across diverse historical periods and intellectual traditions, the book illuminates how dialectics has continually evolved to address the pressing intellectual and social challenges of each era. By tracing the historical trajectory of dialectics from its ancient spontaneous forms to its modern expressions, the book highlights the significant transformations it has undergone over time. The book also addresses the growing crisis in many fields dominated by reductionist and narrowly empirical approaches which have proved inadequate for capturing the complexity and dynamism of developmental processes. In response, it points to a resurgence of interest in dialectics as a powerful methodological alternative. A central claim of the book is that the full potential of dialectics remains largely unrealised. Far from being an obsolete relic of the past, dialectics emerges as an essential method, particularly for the study of complex dynamic systems. Ultimately, the book reconstructs the historical trajectory of dialectics and advocates its vital role in confronting the epistemological and methodological challenges of contemporary inquiry in an ever-changing world.

*Mapping Possibility* Leonie Sandercock, 2023-01-27 *Mapping Possibility* traces the intertwined intellectual, professional, and emotional life of Leonie Sandercock. With an impressive career spanning nearly half a century as an educator, researcher, artist, and practitioner, Sandercock is one of the leading figures in community planning, dedicating her life to pursuing social, cultural, and environmental justice through her work.
