Dialogues Concerning Two New Sciences Galileo Galilei The Discourses and Mathematical Demonstrations Relating to Two New Sciences Italian Discorsi e Dimostrazioni Matematiche Intorno a Due Nuove Scienze published in 1638 was Galileo s final book and a scientific testament covering much of his work in physics over the preceding thirty years FOR more than a century English speaking students have been placed in the anomalous position of hearing Galileo constantly referred to as the founder of modern physical science without having any chance to read in their own language what Galileo himself has to say Archimedes has been made available by Heath Huygens Light has been turned into English by Thompson while Motte has put the Principia of Newton back into the language in which it was conceived To render the Physics of Galileo also accessible to English and American students is the purpose of the following translation The last of the great creators of the Renaissance was not a prophet without honor in his own time for it was only one group of his country men that failed to appreciate him Even during his life time his Mechanics had been rendered into French by one of the leading physicists of the world Mersenne Within twenty five years after the death of Galileo his Dialogues on Astronomy and those on Two New Sciences had been done into English by Thomas Salusbury and were worthily printed in two handsome quarto volumes The Two New Sciences which contains practically all that Galileo has to say on the subject of physics issued from the English press in 1665 It is supposed that most of the copies were destroyed in the great London fire which occurred in the year following We are not aware of any copy in America even that belonging to the British Museum is an imperfect one Again in 1730 the Two New Sciences was done into English by Thomas Weston but this book now nearly two centuries old is scarce and expensive Moreover the literalness with which this translation was made renders many passages either ambiguous or unintelligible to the modern reader Other than these two no English version has been made Two New Sciences Galileo Galilei, 1989
