Development Of Perception Psychobiological Perspectives Volume 2 The Visual System:

Development of Perception Richard Aslin, 2012-12-02 Development of Perception Psychobiological Perspectives Volume 2 The Visual System is the second of two part series covering vision audition olfaction taste tactile sensitivity and sensory motor activity during ontogenesis The focus is on approaches to perceptual development that incorporate a psychobiological perspective The present volume brings together several topics of critical importance to the process of understanding the visual system The book is organized into three parts Part A addresses the theoretical and interpretive issues involved in designing and drawing conclusions from research on the development of the visual system Part B on animal studies of visual development covers the neural and behavioral characteristics of the cat and monkey visual system during the early postnatal period Part C examines visual development in human infants Together these three parts offer a comprehensive coverage of major issues in the structure and function of the developing mammalian visual system Each chapter emphasizes the behavioral consequences of developing visual functions

Handbook of Cultural Developmental Science Marc H. Bornstein, 2014-06-03 Researchers and theoreticians commonly acknowledge the profound impact of culture on all aspects of development However many in the field are often unaware of the latest cultural literatures or how development proceeds in places other than their home locations This comprehensive handbook covers all domains of developmental science from a cultural point of view and in all regions of the globe Part 1 covers domains of development across cultures and Part 2 focuses on development in different places around the world The Handbook documents child and caregiver characteristics associated with cultural variation and it charts relations between cultural and developmental variations in physical mental emotional and social development in children parents and cultural groups This contemporary and scholarly resource of culture in development covers theoretical methodological substantive and ethnic issues as well as geographic approaches Each chapter includes an introduction historical and demographic considerations theory an overview of the most important classical and modern research studies recommended future directions in theory and research and a conclusion The chapters focus on children from the prenatal stage through adolescence Interdisciplinary in nature the Handbook will appeal to human development theoreticians researchers and students in psychology education and pediatrics Ideal for those new to the field readers will appreciate the plethora of cultural examples from all fields of child and human development and developmental examples from all fields of cultural study

Brain Mechanisms and Spatial Vision D.J. Ingle, Marc Jeannerod, David Lee, 1984-12-31 This volume contains chapters derived from a N A T O Advanced Study Institute held in June 1983 As the director of this A S I it was my hope that some of the electrophysiologists could express the potentialities of their work for perceptual theory and that some perceptionists could speculate on the underlying units of perception in a way that would engage the imagination of physiologists The reader will have to be the judge of whether this was achieved or whether such a psychophysiological interlingua is still overly idealistic It is clear that after the revolution precipitated by Hubel and Weisel

in understanding of visual cortical neurons we still have only a foggy idea of the behavioral output of any particular species of cortical detector It was therefore particularly unfortunate that two persons who have made great strides in correlating interesting facets of cat cortical physiology with human psychophysics Max Cynader and Martin Regan of Dalhousie University were unable to attend this meeting Nevertheless a number of new and challenging ideas regarding both spatial perception and cortical mechanisms are represented in this volume and it is hoped that the reader will remember not only the individual demonstrations but the critical questions posed by the apposition of the two different collections of experimental facts David Ingle April 1984 VII TABLE OF CONTENTS PREFACE V D N Lee and D S Young Visual Timing of Interceptive Action 1 J J

Handbook of Neuroscience for the Behavioral Sciences, Volume 2 Gary G. Berntson, John T. Cacioppo, 2009-10-12 As technology has made imaging of the brain noninvasive and inexpensive nearly every psychologist in every subfield is using pictures of the brain to show biological connections to feelings and behavior Handbook of Neuroscience for the Behavioral Sciences Volume II provides psychologists and other behavioral scientists with a solid foundation in the increasingly critical field of neuroscience Current and accessible this volume provides the information they need to understand the new biological bases research tools and implications of brain and gene research as it relates to psychology

Perceptual Development in infancy A. Yonas, 2013-08-21 Each year the Institute of Child Development brings together a group of distinguished investigators who share a common desire to understand the nature of development The chapters in this volume are based on papers presented at the 20th of this continuing series the Minnesota Symposia on Child Psychology The meetings were held October 31 through November 2 1985 at the University of Minnesota

Development of Perception: Audition, somatic perception, and the chemical senses Richard N. Aslin, Jeffrey R. Alberts, Michael R. Petersen, 1981

Infant Development Alan Slater, J. Gavin Bremner, 1989 The book provides detailed up to date and authoritative accounts of major areas of infant development The 11 chapters are subdivided into three sections Perceptual Development 4 chapters Cognitive Development 3 chapters Social Interaction Early Language and Emotion 4 chapters While written by different contributors the book is a well integrated account of current developments in our understanding of infant development Integration of the chapters is assisted by the editors linking sections which introduce each of the three major sections of the book The book begins with an account of the development of basic visual functions in early infancy and of visual memory and perceptual capabilities of the infant This is followed by recent research into infants ability to detect and respond to events and encounters a theme which emphasises the continuity of perceptual and cognitive development Cognitive development is further pursued by an account of the complex area of object permanence and the development of spatial awareness and how infants learn to solve problems In the final section early social and language development are explored Infants learn language in a social context and the social structuring of infant cognition and language is next considered The final chapter considers the role of emotion in infant development from a psychoanalytic perspective The book

presupposes no detailed knowledge of infancy on the part of the reader but at the same time the reader is guided to an understanding of the topical and lively controversies that represent the current state of the art and which make the field of infant development such a lively and interesting area of study. In the final section early social and language development are explored. Infants learn language in a social context and the social structuring of infant cognition and language is next considered. The final chapter considers the role of emotion in infant development from a psychoanalytic perspective. The book presupposes no detailed knowledge of infancy on the part of the reader but at the same time the reader is guided to an understanding of the topical and lively controversies that represent the current state of the art and which make the field of infant development such a lively and interesting area of study.

Development in Infancy Marc H. Bornstein, Michael E. Lamb, 2002-06 This fourth edition of the best selling topically organized introduction to infancy reflects the enormous changes that have occurred in our understanding of infants and their place in human development over the past decade.

Perceiving in Depth, Volume 1 Ian P. Howard, 2012-02-24 The three volume work *Perceiving in Depth* is a sequel to *Binocular Vision and Stereopsis* and to *Seeing in Depth* both by Ian P. Howard and Brian J. Rogers. This work is much broader in scope than the previous books and includes mechanisms of depth perception by all senses including aural electrosensory organs and the somatosensory system. Volume 1 reviews sensory coding, psychophysical and analytic procedures and basic visual mechanisms. Volume 2 reviews stereoscopic vision. Volume 3 reviews all mechanisms of depth perception other than stereoscopic vision. The three volumes are extensively illustrated and referenced and provide the most detailed review of all aspects of perceiving the three dimensional world. Volume 1 starts with a review of the history of visual science from the ancient Greeks to the early 20th century with special attention devoted to the discovery of the principles of perspective and stereoscopic vision. The first chapter also contains an account of early visual display systems such as panoramas and peepshows and the development of stereoscopes and stereophotography. A chapter on the psychophysical and analytic procedures used in investigations of depth perception is followed by a chapter on sensory coding and the geometry of visual space. An account of the structure and physiology of the primate visual system proceeds from the eye through the LGN to the visual cortex and higher visual centers. This is followed by a review of the evolution of visual systems and of the development of the mammalian visual system in the embryonic and post natal periods with an emphasis on experience dependent neural plasticity. An account of the development of perceptual functions especially depth perception is followed by a review of the effects of early visual deprivation during the critical period of neural plasticity on amblyopia and other defects in depth perception. Volume 1 ends with accounts of the accommodation mechanism of the human eye and vergence eye movements.

Psychological Development in Infancy Frederick J. Morrison, Catherine Lord, Daniel P. Keating, 2013-10-22 *Applied Developmental Psychology* Volume 3 is a collection of papers from different experts in the field of psychology in an attempt to put forth a vision of psychology as a developmental science through its

applications in different studies The book covers topics such as psychological development in infancy the meanings of constructs and the measurement and meaning of parent child interaction Also covered are topics such as the development of high risk infants in low risk families as well as the effects of deprivation on human visual development The text is recommended to psychologists especially those who would like to research on how the field can be viewed as a developmental science
