Dewey On Education Selections:

Dewey on Education Martin S. Dworkin, 1959 Dworkin has gathered some of Dewey's clearest and most characteristic statements on education and set them in the stream of American social and intellectual history. In addition, he has indicated some of the rich literature available to those who would probe more deeply into Dewey's ideas and the context in which they matured.

In this collection Reginald D Archambault has assembled John Dewey's major writings on education. He has also included basic statements of Dewey's philosophic position that are relevant to understanding his educational views. These selections are useful not only for understanding Dewey's pedagogical principles but for illustrating the important relation between his educational theory and the principles of his general philosophy. Professor Archambault has divided the selections into seven general categories: Philosophy and Education, Ethics and Education, Aesthetics and Education, Science and Education, Psychology and Education, Society and Education, and Principles of Pedagogy. In his Introduction, the editor discusses these categories, influences on Dewey's writing, and important concepts in the philosopher's theory of education. He emphasizes that in order to understand Dewey's educational writings, it is essential to understand his conception of science. The volume contains twenty-nine selections, all of which are complete essays or chapters from Dewey's major works. This comprehensive volume should prove valuable to philosophers, educational theorists, teachers, and students who want a wide selection of Dewey's educational thought. As Professor Archambault writes, "These principles and the educational prescriptions and controversies that spring from them are as vital today as they were when they exploded on the educational horizon at the turn of the century. We should be able with distance and fresh perspective to reconstruct them to use a favorite term of Dewey's so that their value for us can be revitalized."

classroom use **Community Heritage in the Arab Region** Arwa Badran,Shatha Abu-Khafajah,Sarah Elliott,2022-11-07
This book investigates approaches to community heritage within the Arab region and the underlying theories associated with
these approaches It aims within the context of the region to define community and heritage as well as examine the
emergence and development of this field The volume s contributors deploy a wealth of case studies from the Middle East and
North Africa to provide a unique forum for discussion comparability analysis and deeper understandings of current trends in
community heritage In particular the volume explores the relationship between communities and their heritage the meanings
and values placed upon it the nature and degree of community participation and engagement in its interpretation and
management and how its different registers affect and produce sometimes unexpected community heritage formations It also
examines the level of responsibility held within the profession towards this essentially democratic process of public
participation in their heritage in a region shaped by controversial histories political turmoil and tourism driven economies
The volume builds on current research and practice in community heritage globally by debating and re centring a suite of
familiar and new issues related to hitherto under researched regional specific methodologies and developing fresh insight
into the theoretical underpinning of these practices It will be of value to heritage scholars and practitioners as well as those
interested in politics identity education and the dynamics of heritage based sustainable development *The Promise of
Pragmatism* John Patrick Diggins,1995-05-15 For much of our century pragmatism has enjoyed a charmed life holding the
dominant point of view in American politics law education and social thought in general After suffering a brief eclipse in the
post World War II period pragmatism has enjoyed a revival especially in literary theory and such areas as poststructuralism
and deconstruction In this sweeping critique of pragmatism and neopragmatism one of our leading intellectual historians
traces the attempts of thinkers from William James to Richard Rorty to find a response to the crisis of modernism John

Patrick Diggins analyzes the limitations of pragmatism from a historical perspective and dares to ask whether America's one original contribution to the world of philosophy has actually fulfilled its promise. In the late nineteenth century intellectuals felt themselves in the grips of a spiritual crisis. This confrontation with the acids of modernity eroded older faiths and led to a sense that life would continue in the awareness of absences: knowledge without truth, power without authority, society without spirit, self without identity, politics without virtue, existence without purpose, history without meaning. In Europe Friedrich Nietzsche and Max Weber faced a world in which God was dead and society was succumbing to structures of power and domination. In America Henry Adams resigned from Harvard when he realized there were no truths to be taught and when he could only conclude: Experience ceases to educate. To the American philosophers of pragmatism it was experience that provided the basis on which new methods of knowing could replace older ideas of truth. Diggins examines how in different ways William James, Charles Peirce, John Dewey, George H. Mead, and Oliver Wendell Holmes Jr. demonstrated that modernism posed no obstacle in fields such as science, education, religion, law, politics, and diplomacy. Diggins also examines the work of the neopragmatists Jürgen Habermas and Richard Rorty and their attempt to resolve the crisis of postmodernism. Using one author to interrogate another, Diggins brilliantly allows the ideas to speak to our conditions as well as theirs. Did the older philosophers succeed in fulfilling the promises of pragmatism? Can the neopragmatists write their way out of what they have thought themselves into? And does America need philosophers to tell us that we do not need foundational truths when the Founders already told us that the Constitution would be a machine that would depend more upon the counterpoise of power than on the claims of knowledge? Diggins addresses these and other essential questions in this magisterial account of twentieth-century intellectual life. It should be read by everyone concerned about the roots of postmodernism and its links to pragmatism and about the forms of thought and action available for confronting a world after postmodernism.
