

FF_5 - FF_5 - Import Electronic Bank Statement

Functionality

Using this function you can import bank statements into the system and then process them. This report can perform automatic postings or create batch input session. It posts to G/L accounts and to sub-ledger accounts.

You can specify whether both sessions should be created in one run or only the session for G/L accounting first.

For incoming payments, the notes to payee lines of the account statement can be searched either for document numbers or reference document numbers by specifying the selection field (BELNR or XBELNR). Thus, the relevant information for clearing customer payments is obtained.

If you do not specify a selection field, the note to payee fields are not interpreted and you need to clear open items manually (use transaction FEBA – Postprocess)

For outgoing payments, the system always searches for the document number.

Scenario

You've received files that contain bank statement from your bank and now you want to use this information to post bank statement.

Requirements

Electronic bank statement.

Menu Path	Accounting – Financial Accounting – Banks – Incomings – Bank Statement – FF_5 - Import
