Design Issues ,2011 **Environmental Dilemmas** Robert Mugerauer, Lynne Manzo, 2008-05-18 Because many people and ecosystems share or constitute any given place they all have a stake in the outcome of what any of us do in regard to environmental problems It is not surprising that issues are hotly contested given the many divergent interests needs and preferences of a community s members much less those of people downstream who are affected by the consequences of our actions or of outside parties who play a part including those who would speak on behalf of the ecosystems Thus we not only must make careful individual decisions concerning the environment but need to improve the way we operate socially especially given the roles and responsibilities we have as environmental professionals private sector developers public policy makers and staff or engaged citizens To aid in resolving our environmental dilemmas Mugerauer and Manzo focus on the decision making process Their goal is to help readers become more aware of the worldviews beliefs and values that enter into the decisions they make and to better resolve differences with others To guide readers in thinking about their own positions and how to approach ethical decisions Mugerauer and Manzo employ a number of exercises and cases to

investigate the choices and issues that different stakeholders face for example concerning sustainability Additionally the book presents alternatives in terms of formalized ethical principles the major ethical theories and professional codes of ethics
