R. F. Andrews,1985 *Embodied Spirituality in a Sacred World* Michael Washburn,2012-02-01 Anyone seeking a deeper understanding of human spirituality will find something of value in Michael Washburn s new book Drawing on a rich variety of psychoanalytic Jungian and existential phenomenological sources and on both Western and Asian spiritual texts Embodied Spirituality in a Sacred World provides a theoretical foundation for the idea that human development follows a spiral path Washburn shows that ego development early in life requires us to turn our backs on original sources of our existence and therefore that spiritual development later in life requires us to spiral back to these sources on the way to whole psyche integration He elucidates the underlying causes and pivotal events that set development on its spiral course and traces six major dimensions of experience as they unfold along the spiral path the unconscious the energy system the ego system the perceived other the experiential body and the life world In providing a theoretical foundation for the idea of the spiral path Washburn defends the idea against its critics and helps explain why the idea has been compelling to so many people in diverse traditions How the Maya Built Their World Elliot M. Abrams,1994 Maya architecture is often described as massive and monumental but experiments at Copan Honduras convinced Elliot Abrams that 300 people could have built one of the large palaces there in only 100 days In this groundbreaking work Abrams explicates his theory of architectural energetics which involves translating structures into volumes of raw and manufactured materials that are then multiplied by the time required for their production and assembly to determine the labor costs of past construction efforts Applying this method to residential structures of the Late Classic period A D 700 900 at Copan leads Abrams to posit a six tiered hierarchic social structure of political decision making ranging from a stratified elite to low ranking commoners By comparing the labor costs of construction and other economic activities he also prompts a reconsideration of the effects of royal construction demands on commoners How the Maya Built Their World will interest a wide audience in New and Old World anthropology archaeology architecture and engineering **Algebra** Yuri Bahturin,2011-05-02 No detailed description available for Algebra
