Politics and Heidegger's Concept of Thinking in Contemporary Art Louise Carrie Wales, 2021-09-16 Responding to Heidegger's stark warnings concerning the essence of technology this book demonstrates art's capacity to emancipate the life world from globalized technological enframing Louise Carrie Wales presents the work of five contemporary artists Martha Rosler Christian Boltanski Krzysztof Wodiczko and collaborators Noorafshan Mirza and Brad Butler who challenge our thinking and compel a dramatic re-positioning of social norms and hidden beliefs The through line is rooted in Heidegger's question posed at the conclusion of his technology essay as understood through artworks that provides a counter to enframing while using increasingly sophisticated technological methods The themes are political in nature and continue to have profound resonance in today's geopolitical climate The book will be of interest to scholars working in art history aesthetics philosophy and visual culture

Inquiry into Philosophical and Religious Issues Rosemary Laoulach, 2019-12-13 Inquiry into Religious and Philosophical Issues provides an educational experience of both wonder and discovery The text's focus on epistemology applies this inquisitive discipline to an array of topics including religious faith ethics personal meaning and happiness Sources from philosophy theology and psychology interact with debates role playing essays and other student centered activities to encourage meaningful thinking and engagement Students are taught skills to develop personal awareness and resilience in order to help them flourish Complex subjects such as religion and philosophy often lead to difficult questions and ideas that for many students go unheard With Inquiry into Religious and Philosophical Issues these questions and ideas will now have a voice

Contemporary Composition Studies Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field's development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most

influentially to the field and provides both a chronological overview of the person's contributions and a bibliography of representative works. The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline. The entries for the terms show how the disciplinary context has shaped the ways in which they have been used. The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms, provide examples of the terms in context, and list scholars often associated with them. An appendix includes entries for scholars from other disciplines who have contributed to the field.
