*Structures* Katharina Hartmann, Tonjes Veenstra, 2013-11-15 The phenomenon of clefts is beyond doubt a golden oldie It has captivated linguists of different disciplines for decades The fascination arises from the unique syntax of clefts in interaction with their pragmatic and semantic interpretation Clefts structure sentences according to the information state of the constituents contained in them They are special as they exhibit a rather uncommon syntactic form to achieve the separation of the prominent part either focal or topical from the background of the clause Despite the long lasting interest in clefts linguists have not yet come to an agreement on many basic questions The articles contained in this volume address these

issues from new theoretical and empirical perspectives Based on data from about 50 languages from all over the world this volume presents new arguments for the proper derivation of clefts and contributes to the ongoing debate on the information structural impact of cleft structures Theoretically it combines modern syntactic theorizing with investigations at the interface between grammar and information structure

**Japanese Psycholinguistics** Joseph F. Kess, Tadao Miyamoto, 1994-01-01

This classified and annotated research bibliography is meant to serve as an introduction to the rich field of Japanese psycholinguistics by providing an exhaustive inventory of what has been done in or about Japanese in a psycholinguistic sense Thus this volume captures the tradition of psycholinguistic research currently being pursued in Japan its history and development over the past thirty years and its current directions and research themes as well as international research in modern psycholinguistics which targets the Japanese language as the focal point of empirical procedures or deductive analysis in psychology linguistics psycholinguistics and cognitive science The bibliography supports a broad view of psycholinguistics acknowledging that psycholinguistic research in how natural language is learned produced comprehended stored and recalled now reaches beyond its traditional roots in the two disciplines of psychology and linguistics The interested scholar will thus find entries from the traditional core of psycholinguistic research on natural language as well as entries from related areas which have either influence or been influenced by psycholinguistic work on Japanese Every article text and edited volume listed in the bibliography is available through normal library channels and is thus accessible to the scholar interested in what psycholinguistic research has been done in or on the Japanese language in Japan and internationally The annotations for each entry have been especially written for this bibliographic inventory and with the linguist psychologist and psycholinguist specifically in mind The authors intention is to maximize the usefulness of such an inventory by preparing annotations for the interested reader who wishes to know not only what the article contains but where it fits in the research tradition

**Culture Through Time** Emiko Ohnuki-Tierney, 1990 Anthropological literature has traditionally been static and synchronic only occasionally according a role to historical processes but recent years have seen a burgeoning exchange between anthropology and history each field taking on a powerful new dimension in consequence Just what this means for anthropologists has not been clear and this collection eight core papers plus introduction and final commentary introduces focus and direction to this interface between anthropology challenges several basic assumptions long held by anthropologists Researchers can no longer be satisfied with approaches epitomized in the ethnographic present Society may be a bounded entity but culture cannot be treated as such a culture should be examined as it has interacted with other cultures and with its environment over time Many traditionalists in anthropology faced with these disturbing new challenges fear the disintegration of the discipline but these thoughtful papers demonstrate on the contrary its vitality growth and promise In this volume major figures in symbolic semiotic anthropology offer various approaches to examining culture through time culture mediated by history and history mediated by culture in its complexity and dynamics The eight

core papers focus on particular cultures in various locales Hawaii Nepal Spain Japan Israel India and Indonesia No artificial unity theoretical thematic or epistemological has been imposed The strength of the volume derives from a complementary diversity and tension as each player drawing on a particular culture offers an original way of penetrating that culture s historical dimensions
