Journal of the Society of Basque Studies in America ,2008 Gabelentz and the Science of Language James McElvenny,2025-10-01 The German sinologist and general linguist Georg von der Gabelentz 1840 1893 occupies a crucial place in linguistic scholarship around the end of the nineteenth century As professor at the University of Leipzig and then at the University of Berlin Gabelentz was present at the main centers of linguistics of the time He was however generally critical of the narrow technical focus of mainstream historical comparative linguistics as practiced by the Neogrammarians and instead emphasized approaches to language inspired by a line of researchers stemming from Wilhelm von Humboldt Gabelentz alternative conception of linguistics led him to several pioneering insights into language that anticipated elements of the structuralist revolution of the early twentieth century Gabelentz and the Science of Language brings together four essays that explore Gabelentz contributions to linguistics from a historical perspective In addition it makes one of his key theoretical texts Content and Form of Speech available to an English speaking audience for the first time **Cultural Education - Cultural Sustainability** Zvi Bekerman,Ezra Kopelowitz,2008-02-06 This volume is a path breaking contribution to the study of efforts of diaspora indigenous and minority groups broadly defined to use education formal and informal to sustain cultural continuity while grappling with the influences and demands of wider globalizing nationalizing or other homogenizing and assimilatory forces Particular attention is given to groups that use educational elements other than second language teaching alone in programs to sustain their particular cultural traditions The focus of the book on cultural

sustainability changes the nature of questions posed in multicultural education from those that address the opening of boundaries to issues of preserving boundaries in an open yet sustainable way As forced and elective immigration trends are changing the composition of societies and the educational systems within them bringing a rich diversity of cultural experience to the teaching learning process diaspora indigenous and minority groups are looking more and more for ways to sustain their cultures in the context of wider socio political influences This volume is a first opportunity to consider critically multicultural efforts in dialogue with educational options that are culturally particularistic but at the same time tolerant Academics will find this an excellent reference book Practitioners will draw inspiration in learning of others efforts to sustain cultures and will engage in critical reflection on their own work vis vis that of others Teachers will realize they do not stand alone in their educational efforts and will uncover new strategies and methodologies through which to approach their work

Learning a non-native language in a naturalistic environment: Insights from behavioural and neuroimaging research Christos Pliatsikas, Vicky Chondrogianni, 2015-09-02 It is largely accepted in the relevant literature that successful learning of one or more non native languages is affected by a number of factors that are independent of the target language s per se these factors include the age of acquisition AoA of the target language s the type and amount of formal instruction the learners have received as well as the amount of language use that the learners demonstrate Recent experimental evidence suggests that one crucial factor for efficient native like performance in the non native language is the amount of naturalistic exposure or immersion that the learners receive to that language This can be broadly defined as the degree to which language learners use their non native language outside the classroom and for their day to day activities and usually presupposes that the learners live in an environment where their non native language is exclusively or mostly used Existing literature has suggested that linguistic immersion can be beneficial for lexical and semantic acquisition in a non native language as well as for non native morphological and syntactic processing More recent evidence has also suggested that naturalistic learning of a non native language can also have an impact on the patterns of brain activity underlying language processing as well as on the structure of brain regions that are involved expressed as changes in the grey matter structure This Research Topic brings together studies on the effects of learning and speaking a non native language in a naturalistic environment These include more efficient or native like processing in behavioural tasks tapping on language lexicon morphology syntax as well as changes in the brain structure and function as revealed by neuroimaging studies

Community Series: Spanish Psycholinguistics, volume II Isabel Fraga, Pilar Ferré Romeu, Jon Andoni Dunabeitia, Mikel Santesteban, 2025-12-05 This Research Topic is the second volume of Research Topic Community Series Spanish Psycholinguistics Please see the first volume here Spanish is the second most widely spoken language in the world used by more than 400 million people on the planet This being the case it is not surprising that the beginning of the 21st century has represented a clear transition towards the professionalization of experimental research in Spanish psycholinguistics

Hundreds of research groups from different countries have focused their activity on Spanish as a target language and more and more scientific studies based on Spanish shed light on the cognitive processes that underlie the acquisition learning perception or production of language It is not difficult to find centers specialized in the psycholinguistic or neurolinguistic study of people who speak Spanish as their first language just as it is not difficult to find laboratories that explore the learning and processing of Spanish as a second language additional language heritage language or foreign language Besides the last decades have witnessed the progressive emergence and consolidation of research groups and centers with their laboratories and main scientific actions based in the Spanish territory and regardless of the specific target language used in their daily research agenda together they have contributed to establishing Spain as a key player in the international psycholinguistic arena The current Community Series is aimed at enhancing visibility of the psycholinguistic research done by groups laboratories and centers whose main research activity is carried out in Spain or whose target language in their investigations is Spanish or any of the other languages spoken in Spain Catalan Galician Basque or other regional languages This volume will contribute to boosting scientific outreach of the psycholinguistic community working in Spain or on Spanish This Community Series volume is open to submissions from researchers from any country that study Spanish either as a native or non native language from a psycholinguistic perspective Also this volume accepts submissions of any research group exploring psycholinguistics and set in Spain regardless of the language they use as target of research be it a majority or a minority or minoritized language This extends to Spanish laboratories and research teams working on Basque Catalan or Galician among others We welcome all types of articles Special consideration will be given to the following article types Systematic Review Review and Mini Review along with experimental studies presenting empirical data in the form of Brief Research Report Registered Report Original Research or Data Report

Multilingualism in European Bilingual Contexts David Lasagabaster, Angel Huguet, 2007 Despite the spread of multilingualism the number of research studies in multilingual contexts is scarce This book deals with this question by examining would be teachers language use and attitudes as their influence on future generations can be enormous The use of the same questionnaire and the same methodology allows the reader to compare the results obtained in different European bilingual contexts where the presence of diverse foreign languages leads to a situation in which several languages are in contact

This article will explore the advantages of Basque Table books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Basque Table books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals.
