**Gender** Linda Brannon, 2015-07-22 This bestselling text presents research about gender and helps students think critically about the differences between research findings and gender stereotypes. It examines the biology and social context in which women and men express gendered behaviors. Defining gender as the behaviors and attitudes that relate to but are not entirely congruent with biological sex, the book focuses on research and scholarship to provide the material for a critical review and an overall picture of gender from a psychological perspective. To highlight how research findings can relate to people's lives, the book supplements the review of scholarly research with personal narrative accounts of gender-relevant aspects of people's lives. To emphasize the cross-cultural perspective of gender, the book includes a section on diversity in most chapters but also weaves diversity issues throughout the text. The personal narrative and diversity highlights help to balance the research-based scholarship with the personal experience of gender. *Strategic Decision Making* Simon Haslam, Ben Shenoy, 2018-01-03 Making strategic decisions is a fundamental skill for leaders and managers. However, in a business environment that is in a constant state of change, making strategic decisions has never been more difficult. *Strategic Decision Making* addresses this challenge by providing a framework that can be used to make sound decisions in an uncertain world. Structured around the core concepts of framing, experimenting, and scaling, this book will ensure that efforts are focused where the need is greatest, that interventions are tested, evaluated, and revised if necessary, and that successful initiatives are effectively rolled out across the business. Packed with real-world examples and backed up by academic research, *Strategic Decision Making* will allow today's leaders and the leaders of tomorrow to make successful and defensible business choices. It shows how to avoid decision-making bias, overcome organizational inertia, manage the difficulties of rigid organizational structures, and avoid being side-tracked by outdated or irrelevant experience. Essential reading for business practitioners and management students alike, this comprehensive guide provides a robust approach to achieving strategic success. **Companion to Psychiatric Studies** Alistair Forrest, James Affleck, Andrew K. Bonds, 2026-02-20 Before 1961, many psychologists believed that watching violence drained aggressive impulses (catharsis). Albert Bandura suspected the opposite. He showed children a video

of an adult beating up an inflatable Bobo doll When the children were later left alone with the doll they didn't just play they mimicked the exact violent assaults they had seen even using guns and hammers This book details the experiment that founded Social Learning Theory It argues that we are not born violent but we learn it through modeling In an age of TikTok challenges and media violence Bandura's findings are more relevant than ever We are the mirrors of our environment
