Angels Of Mercy Or Development Diplomats:

Angels of Mercy Or Development Diplomats? Terje Tvedt, 1998 Is the world witnessing a global associational revolution spearheaded by development non governmental organizations NGOs Is the relationship between states and societies being more fundamentally redefined even in remote rural corners of the world What role does the mushrooming of development NGOs play in this political ideological process What about NGO staff Are they angels of mercy government paid development diplomats propagandists for a triumphant West or instruments in a coming clash between civilizations Presented here are cases from Zimbabwe Ethiopia Eritrea Sudan Bangladesh and Nicaragua that shed light on these complex questions The text puts forward a critique of central theories and concepts which have dominated research and discourse on development NGOs It also proposes and demonstrates some different analytical approaches Publisher description

Angels of Mercy Or Development Diplomats Terje Tvedt, 1998 I de to seneste rtier er NGO er blevet en en central del af administrationen af udviklingsbistand Bogen analyserer denne store ndring og sp rger om NGO erne er bedre til at bruge og fordele pengene end statslige organisationer

New Threats and New Actors in International Security E. Krahmman, 2005-01-14 Non state threats and actors have become key topics in contemporary international security as since the end of the Cold War the notion that state is the primary unit of interest in international security has increasingly been challenged Statistics show that today many more people are killed by ethnic conflicts HIV AIDS or the proliferation of small arms than by international war Moreover non state actors such as non governmental organizations private military companies and international regimes are progressively complementing or even replacing states in the provision of security Suggesting that such developments can be understood as part of a shift from government to governance in international security this book examines both how private actors have become one of the main sources of insecurity in the contemporary world and how non state actors play a growing role in combating these threats

Foreign Aid in the Middle East Beáta Paragi, 2019-02-28 What do we mean by gifts in International Relations Can foreign aid be conceptualized as a gift Most foreign aid transactions are unilateral and financially unreciprocated yet donors expect to benefit from them Previous research dealing with foreign aid has analyzed the main donor motives and interests in providing financial support This book offers an in depth analysis of the invisible political or social exchange taking place between recipient countries and donors when a grant agreement is signed Focusing on Egypt Jordan Palestine and Israel the main beneficiaries of Western foreign aid the book uses gift theories and theories of social exchange to show how international social bonds are shaped by foreign aid and in what ways recipient countries are obliged to return the gift they receive Foreign aid is a means of buying stability or democracy in the region but Beata Paragi is interested here to understand the actual feasibility of Western assistance Looking at the context of the Arab Spring the book examines how aid impacts on a recipient country s domestic political events such as war the quest for self determination the struggle against occupation and the fight for dignity An original

contribution to Middle East Studies and International Relations the research presents an alternative interpretation of foreign aid and show how external funds interact with local developments and realities *NGOs and Human Rights* Claude E. Welch, Jr.,2001 Claude E Welch Jr The Global Resurgence of Religion and the Transformation of International Relations S. Thomas,2005-02-04 This book is about the global resurgence of culture and religion in international relations and how these social changes are transforming our understanding of International Relation theory and the key policy related issue areas in world politics It is evident in the on going debates over the root causes of 9 11 that there are many scholars journalists and members of the public who still believe culture and religion can be explained away by appeals to more basic economic social or political forces in society Therefore The Global Resurgence of Religion and the Transformation of International Relations presents an argument for taking culture and particularly religion as social forces that are important for understanding world politics in the post Westphalian era The Influence of Faith Elliott Abrams,2002-05-30 Realists have long argued that the international system must be based on hard calculations of power and interest But in recent years religion s role on the international scene has grown The Influence of Faith examines religion as a growing factor in world politics and U S foreign policy Particular attention is placed on the American reaction to the persecution of Christians and Jews overseas as well as the role of faith based groups such as missionary and relief organizations in the formulation and implementation of U S policy The Influence of Faith considers these timely issues from diverse points of view offering broad historical analysis as well as concrete examples taken from current affairs
