Cultures in Contact Dawn M. Hadley, J. D. Richards, 2000 This volume examines the Scandinavian impact on England in the ninth and tenth centuries with particular reference to Scandinavian settlement and the diverse ways in which the Scandinavians and the native populations responded to each other Many previous studies have described the settlement as involving a rapid assimilation of the settlers with native society and culture and a swift process of integration This volume challenges that view and shows that the processes of assimilation integration and accommodation were gradual and complex displaying important regional variations Where did the Scandinavians come from What type of society did they eventually settle into What were the implications of the drawing of different cultures in contact and how is this portrayed in the surviving material An important aim of this volume is to open up new interdisciplinary dialogue in Viking Studies and it analyses documentary archaeological artefactual and linguistic evidence The volume also seeks to develop more theoretically sophisticated accounts of Scandinavian settlement and brings the study of this subject up to date in terms of developments in other branches of history archaeology and linguistics Recent discussion in other fields concerning for example material culture and language have shown that they did not simply reflect changes in society but were also active constituent elements in creating and re creating social and cultural identities The volume focuses on the creation of local and regional

identities and affinities and moves on from the traditional depiction of the issues in terms of a simple dichotomy of Scandinavian and English. It takes a more rigorously contextual approach than has hitherto been the case in the study of Scandinavian settlement and seeks to throw new light on the consequences of cultures in contact. *Danes in Wessex* Ryan Lavelle, Simon Roffey, 2015-11-30. There have been many studies of the Scandinavians in Britain but this is the first collection of essays to be devoted solely to their engagement with Wessex. New work on the early Middle Ages, not least the excavations of mass graves associated with the Viking Age in Dorset and Oxford, drew attention to the gaps in our understanding of the wider impact of Scandinavians in areas of Britain not traditionally associated with them. Here a multidisciplinary and interdisciplinary approach to the problems of their study is presented. While there may not have been the same degree of impact discernible particularly in place names and archaeology as in those areas of Britain which had substantial influxes of Scandinavian settlers, Wessex was a major theater of the Viking wars in the reigns of Alfred and thelred. Unr d Two major topics, the Viking wars and the Danish landowning elite, figure strongly in this collection but are shown not to be the sole reasons for the presence of Danes or items associated with them in Wessex. Multidisciplinary approaches evoke Vikings and Danes not just through the written record but through their impact on real and imaginary landscapes and via the objects they owned or produced. The papers raise wider questions too, such as when did aggressive Vikings morph into more acceptable Danes and what issues of identity were there for natives and incomers in a province whose founders were believed to have also come from North Sea areas, if not from parts of Denmark itself. Readers can continue for themselves aspects of these broader debates that will be stimulated by this fascinating and significant series of studies by both established scholars and new researchers.
