Animal Relationships:

Perceptions of Human-Animal Relationships and their Impacts on Animal Ethics, Law and Research Cédric Sueur, Marie Pelé, Tetsuro Matsuzawa, Jean-Yves Georges, 2021-02-09

Companion Animals and Us Anthony L. Podberscek, Elizabeth S. Paul, James A. Serpell, 2000-04-13 Over the past 30 years there has been a tremendous growth in interest in the multidisciplinary field of human companion animal interactions and relationships This is not surprising considering that pets are kept in at least half of the households in Western societies What then is so special about the relationships people have with their pets Are we very different from our ancestors in the ways we feel about animals What does pet keeping tell us about ourselves and our relationships with people Can pets be good for our health Do they help promote empathy for other humans These questions and more are explored in this book Companion Animals and Us brings together some of the newest research from a wide variety of disciplines including anthropology history psychology sociology human and veterinary medicine This book will make fascinating reading for anyone interested in understanding more about the human pet relationship

In the Company of Animals James Serpell, 1996-08-13 What purpose if any do pets really serve Are they simply an outlet for misplaced love Or four legged friends who help us to satisfy vital emotional needs Whatever they are when we elevate pets to the status of social companions we undermine the distinction between human and non human In other words pets force us to confront the moral contradictions inherent in our treatment of animals in general Pursuing this idea to its logical conclusion the author uncovers a fascinating and disturbing trail of myths evasions and double standards which humans have used since earliest times to justify their subjugation of nature and other life forms Through an exploration of the phenomenon of pet keeping across history and between cultures this thought provoking study reassesses our relationships with animals and the natural world This new edition of In the Company of Animals has been substantially revised and updated to take into account developments in research since the first edition was published in 1986

Animal Comics, 2017-12-14 Animal characters abound in graphic narratives ranging from Krazy Kat and Maus to WE3 and Terra Formars Exploring these and other multispecies storyworlds presented in words and images Animal Comics draws together work in comics studies narrative theory and cross disciplinary research on animal environments and human animal relationships to shed new light on comics and graphic novels in which animal agents play a significant role At the same time the volume s international team of contributors show how the distinctive structures and affordances of graphic narratives foreground key questions about trans species entanglements in a more than human world The writers artists covered in the book include Nick Abadzis Adolpho Avril Jeffrey Brown Sue Coe Matt Dembicki Olivier Deprez J J Grandville George Herriman Adam Hines William Hogarth Grant Morrison Osamu Tezuka Frank Quitely Yu Sasuga Charles M Schultz Art Spiegelman Fiona Staples Ken ichi Tachibana Brian K Vaughan and others

Human-livestock Interactions Paul H. Hemsworth, Grahame J. Coleman, 2011 The second edition of this book contains chapters that discuss the role of the

stockperson in animal welfare including attitudes human animal interactions human and animal behaviour and improvement of human animal interactions in animal production This book is intended for those with an interest in human animal interactions including trainers livestock farm managers students and academics *The Internet of Animals* Deborah Lupton,2023-03-07 The internet is made of cats is a half jokingly made claim Today animals of all shapes and sizes inhabit our digital spaces including companion animals wildlife feral animals and livestock In this book Deborah Lupton explores how digital technologies and datafication are changing our relationships with other animals Playfully building on the concept of The Internet of Things she discusses the complex feelings that have developed between people and animals through the use of digital devices from social media to employing animal like robots as companions and carers The book brings together a range of perspectives including those of sociology cultural geography environmental humanities critical animal studies and internet studies to consider how these new digital technologies are contributing to major changes in human animal relationships at both the micropolitical and macropolitical levels As Lupton shows while digital devices and media have strengthened people s relationships to other creatures these technologies can also objectify animals as things for human entertainment therapy or economic exploitation This original and engaging book will be of interest to scholars and students across the social sciences and humanities
