Johnson, 2012-12-06 McCrimmon having gotten Grierson's attention continued A breakthrough you say If it's in economics at least it can't be dangerous Nothing like gene engineering laser beams sex hormones or international relations That's where we don't want any breakthroughs Galbraith 1 K 1990 A Tenured Professor Houghton Mifflin Boston To judge astronomy in this way a narrow utilitarian point of view demonstrates not only how poor we are but also how small narrow and indolent our minds are it shows a disposition always to calculate the payoff Before the work a cold heart and a lack of feeling for everything that is great and honors man One can unfortunately not deny that such a mode of thinking is not uncommon in our age and I am convinced that this is closely connected with the catastrophes which have befallen many countries in recent times do not mistake me I do not talk of the general lack of concern for science but of the source from which all this has come of the tendency to everywhere look out for one's advantage and to relate everything to one's physical well being of the indifference towards great ideas of the aversion to any effort which derives from pure enthusiasm I believe that such attitudes if they prevail can be decisive in catastrophes of the kind we have experienced Gauss K F Astronomische Antrittsvorlesung cited from Buhler W K 1981 Gauss A Biographical Study Springer New York
