Knox, 2010-08-03 Endorsed by the Christian Medical Association You have breast cancer Nothing can prepare you for the devastating shock of those words The fear and grief are mind numbing and yet somehow you still have to wade through a morass of medical concerns and practical decisions How do you even begin to deal with it The journey ahead may seem overwhelming but you have a companion one that will not only walk you and your loved ones through the practical concerns of treatment and support but ground you in deep reassurance that God knows and cares From her years of experience breast cancer surgeon Sally M Knox understands your needs and the issues you face Guiding you through the flow of the medical experience in clear accessible terms she dispenses life saving doses of hope compassion and faith Filled with the best most current medical advice **The Breast Cancer Care Book** makes technical terms and complex choices easy to understand And in the face of one of life s toughest trials it reveals a God who is deeply loving and intimately involved in every step of your journey Practical help for every stage of treatment Explanations of medical terms and choices Biblical insights that team practical knowledge with spiritual strength Help for building your support team Sidebars for loved ones Ideas for helping children cope Much much more **Aging: an Encyclopedia for Adding Years to Your Life and Life to Your Years** Arthur F. Beringause, 2000-12-15 As the number of

old persons increases dramatically information is the one thing both the young who are trying to take care of the old and the elderly who are trying to take care of themselves need to assuage concerns and solve problems that advancing years bring Like their young counterparts the old know shockingly little about care and upkeep not only of the automobile but more important of the human body Aging An Encyclopedia concretely and accurately summarizes the latest research in geriatrics and gerontology while presenting strategies for adding years to your life and life to your years Not just basic questions are answered such as those involving the onset of cancer but also seemingly peripheral ones such as descriptions of government and non profit agencies that can be reached for information and help Included are practical aids such as checklists for choosing a nursing home a doctor a financial planner Theory and application are kept separate Avoided are false hopes and sensationalism too often found in news coverage of aging Only solutions to problems of aging which are medically sound and applicable to everyday life are dealt with This volume does not pretend to state or to answer every question that at present can be raised concerning aging There is no attempt at simple solutions to complex problems The intention is that enough information be included to support and exemplify statements made Although I am immensely indebted to the many researchers upon whose work I have leaned so heavily there are few footnotes acknowledgements and attributions in the text for the attempt here is to bring out essentials clearly without scholarly encumbrances such as raised numbers trailed by sets of dots A guidebook this volume is easy to use and small enough to be carried everywhere The format is designed as a reference to be consulted for particular concerns Essays are organized in more than 80 topics arranged alphabetically Entries are self contained so that a reader can start anywhere Where it is possible to retain accuracy language familiar to lay people has been substituted for scientific jargon Technical terms are explained in the glossary at the end of the volume For more in depth information articles and books are cited in the bibliography and in particular areas although it is wise to remember that publishers and organizations are continually revising or bringing out new writings to reflect research with the most recent data and discoveries

A. Reilly, 2019-05-05 Most people think breast cancer only affects women and men who have a family history Stay healthy eat right don't smoke get yearly mammograms The radiologist tells you you're good until next year You are all set Wrong Breast cancer can affect anyone any age any lifestyle Hidden from view Like an alien hiding in your chest Cancer cells put up a barrier around themselves A disguise so your body doesn't know it's there The only way to protect yourself is a good screening For some of us we have dense to extremely dense breast tissue which is like looking at a snow globe Impossible to see anything We need ultrasounds and MRIs We need good facilities and good doctors We need hope My book My Pink Diary A Survival Guide What Every Woman Should Know is my personal journey with breast cancer from day one to the present My words have helped so many women that I know I wanted to write down all of my experiences and research to help all women Not just the ones I know If my words can save women and help them go through breast cancer or procedures with a sense of ease and familiarity I will feel complete Every time I hear someone I know or a friend of a friend has breast cancer I just want to give them my book Friends ask me all the time if my book is ready so they can give to someone they know who is going through breast cancer My journey can help so many women on so many levels Of course I added in some humor Because laughter sometimes can be one of the best remedies So starts my journey The diary describes everything in detail with pictures charts and research I walked into every appointment and test blind frightened and ill informed Googling everything was foolish and scary I needed facts What would I be going through What can I expect from surgery chemo and radiation Every day was a journey Here it is Everything you need to know Even my medication schedule that I had to follow that prevented me from

being sick from my endless chemo sessions I've included every detail of what to expect and many unexpected details I wish I had known prior Think of my diary as a guide through anyone's journey What does chemo feel like Lumpectomy vs Mastectomy What will happen before and after surgery or when I have biopsies I wish I had been more prepared So I wrote this diary to prepare the reader I was diagnosed with Stage 2B breast cancer in 2015 I had been faithfully going for routine mammograms since I was 39 At age 46 it was the first time in 7 years I was told I had dense breasts No wonder during my past mammograms the radiologists didn't see anything They really couldn't see anything The entire mammogram screen was white I should have been sent for better testing at age 39 This time they thought they saw something Maybe nothing they said After an ultrasound and MRI they found a large suspicious lump along with 5 other lumps 6 lumps in my chest 3 in each breast that had been undetected with the traditional 2D mammogram Who knows how long they have been in my breasts Today I am cancer free but live year to year waiting for the results of my MRIs My journey had to be shared I have been a graphic designer for over 20 years I graduated college with a degree in Journalism and a minor in English I wrote and designed My Diary Although there are thousands of books on breast cancer to the best of my knowledge mine would be the only book in diary form jam packed with information every woman should know written in an easy to read and understand format without technical jargon I wanted to write my book as if I was talking to a friend and I hope this will help everyone through this difficult journey
