**School Choice Policies and Outcomes** Walter Feinberg, Christopher Lubienski, 2008-10-16 Perhaps no school reform has generated as much interest and controversy in recent years as the proposal to have parents select their children's schools. Opponents of school choice fear that rolling back the government's role will lead to profit-driven financial scandals, sectarianism, and increased class and racial isolation. School choice advocates believe that state provision, oversight, and regulation stifle entrepreneurial creativity. The contributors to this volume not only provide a clear assessment of the logic and evidence supporting the different sides of the debate but also unmask the assumptions about the relationship between markets, government, and educational achievement. Their message is that neither markets nor government alone will guarantee freedom, equality, achievement, or community. If choice is to improve education and advance equality, then educational policy cannot be placed on automatic and left to the free market. Rather, choice policy must be deliberately directed toward meeting these goals, and this book shows how that could be accomplished.

**The Liberal Conscience** Lucas Swaine, 2006 This bold work offers solutions to the seemingly irreconcilable divide between liberal society and theocracy by reasserting the importance of the liberty of conscience and principles of religious toleration.

The Great Diversity Debate Kent Koppelman, 2015-04-24 Will America's growing diversity undermine democracy or is it instead a cornerstone of democracy? The Great Diversity Debate is essential reading for anyone who has thought about this question. Koppelman gives us a fascinating, detailed, and evenhanded account of the long historical roots of contemporary controversies surrounding flashpoint issues like affirmative action, multicultural education, and globalization. This well-researched and optimistic book will make you think about and maybe even re-think such issues. Christine Sleeter, Professor Emerita, California State University, Monterey Bay, and President, National Association for Multicultural Education. Based on research from multiple disciplines, The Great Diversity Debate describes the presence and growth of diversity in the United States from its earliest years to the present. The author describes the evolution of the concept of pluralism from a philosophical term to a concept used in many disciplines and with global significance. Rather than assuming that diversity is a benefit, Koppelman investigates the ways in which diversity is actually experienced and debated across critical sectors of social experience, including immigration, affirmative action, education, and national identity, among others. Koppelman takes the sometimes complicated arguments for and against diversity in school and in society and lays out the benefits with great clarity and simplicity, making this book accessible to a large audience.

Book Features: A broad view of diversity in the United

States based on research from philosophy psychology sociology political science economics and more Cogent arguments from both advocates and critics concerning whether pluralism represents an appropriate response to diversity in a democratic society An overview of multicultural education including its origins and its current emphasis on strategies such as culturally responsive teaching Contents The Diversity Debate The Growth of Diversity and Pluralism The Impact of Immigration Pluralism and Democracy Complementary or Contradictory Diversity and Discrimination The Argument over Affirmative Action The Struggle for Identity What Does It Mean to Be an American Multicultural Education in K 12 Schools Preparing Children and Youth to Function Effectively in a Diverse Democratic Society Globalization Diversity and Pluralism Finding the Common Ground Kent Koppelman is professor emeritus of teacher education at the University of Wisconsin La Crosse

**Realizing Educational Rights** Anne Newman,2024-05-31 In Realizing Educational Rights Anne Newman examines two educational rights questions that arise at the intersection of political theory educational policy and law What is the place of a right to education in a participatory democracy and how can we realize this right in the United States Tracking these questions across both philosophical and pragmatic terrain she addresses urgent moral and political questions offering a rare double pronged look at educational justice in a democratic society Newman argues that an adequate K 12 education is the right of all citizens as a matter of equality and emphasizes that this right must be shielded from the sway of partisan and majoritarian policy making far more than it currently is She then examines how educational rights are realized in our current democratic structure offering two case studies of leading types of rights based activism school finance litigation on the state level and the mobilization of citizens through community based organizations Bringing these case studies together with rich philosophical analysis Realizing Educational Rights advances understanding of the relationships among moral and legal rights education reform and democratic politics

**Faith in Schools?** Ian MacMullen,2016-05-31 Should a liberal democratic state permit religious schools Should it fund them What principles should govern these decisions in a society marked by religious and cultural pluralism In Faith in Schools Ian MacMullen tackles these important questions through both political and educational theory and he reaches some surprising and provocative conclusions MacMullen argues that parents desires to educate their children in the faith must not be allowed to deny children the opportunity for ongoing rational reflection about their values Government should safeguard children s interests in developing as autonomous persons as well as society s interest in the education of an emerging generation of citizens But he writes liberal theory does not support a strict separation of church and state in education policy MacMullen proposes criteria to distinguish religious schools that satisfy legitimate public interests from those that do not And he argues forcefully that governments should fund every type of school that they permit rather than favoring upper income parents by allowing them to buy their way out of the requirements deemed suitable for children educated at public expense Drawing on psychological research he proposes public funding of a broad range of religious primary schools because they can help lay the foundations for young children s future autonomy In

secondary education by contrast even private religious schools ought to be obliged to provide robust exposure to the ideas of other religions to atheism and to nonreligious approaches to ethics
