

Sets of Numbers

- The **natural numbers** are the set of numbers used when counting; these are the numbers $\{1, 2, 3, 4, 5, \dots\}$.
- The **whole numbers** are the set of natural numbers and zero; these are the numbers $\{0, 1, 2, 3, 4, 5, \dots\}$.
- The **integers** are the set of whole numbers and their opposites; these are the numbers $\{\dots, -3, -2, -1, 0, 1, 2, 3, \dots\}$.
- The **rational numbers** are the set of numbers that can be expressed as a fraction of two integers where the denominator is not zero. Rational numbers include the set of natural numbers, whole numbers, and integers.

EX: $-1, \frac{2}{3}, 0, 2, \sqrt{16}, 2\frac{1}{2}, 8.8, 2, 35$

- The **irrational numbers** are the set of numbers that cannot be expressed as a fraction of two integers.

EX: $\pi, \sqrt{2}, \sqrt[3]{10}$

- The **real numbers** are the set of rational numbers and irrational numbers.

EX: $-1, \pi, \frac{1}{2}, \sqrt{5}, \sqrt{64}, 0, 125, \sqrt[3]{27}, 0.3$

- The **imaginary numbers** are the set of square roots of negative numbers, written in the form bi , where i is a nonzero real number and $b = \sqrt{-b^2}$.

EX: $-1, 1, 3i, \sqrt{-8}, -\sqrt{-100}$

- The **complex numbers** are the set of real numbers plus an imaginary number, written in the form $a + bi$, where a and b are real numbers and $i = \sqrt{-1}$.

EX: $8 + 2i, -6 + i, -4 - 3i, 7 - 6i, 5i$

Solving Equations

When you perform the same operation to each side of an equation, the result is a new equation that has the same solution. Equations that have the same solution(s) are **equivalent equations**.

Using the Addition Property of Equality

The **Addition Property of Equality** states that when the same number is added to equal numbers, the sum is equal.

RULE: If a , b , and c are any real numbers and $a = b$, then $a + c = b + c$.

EX: $2 + 7 = 2 + 7$

Applying this property to equations, when the same number is added to each side of an equation, the result is an equivalent equation.

EX: If $x - 2 = 11$, then $x - 2 + 2 = 11 + 2$, or $x = 13$

Using the Subtraction Property of Equality

The **Subtraction Property of Equality** states that when the same number is subtracted from equal numbers, the difference is equal.

RULE: If a , b , and c are any real numbers and $a = b$, then $a - c = b - c$.

EX: $12 - 6 = 12 - 6$

Applying this property to equations, when the same number is subtracted from each side of an equation, the result is an equivalent equation.

EX: If $y + 7 = 15$, then $y + 7 - 7 = 15 - 7$, or $y = 8$.

Using the Multiplication Property of Equality

The **Multiplication Property of Equality** states that when equal numbers are multiplied by the same number, the products are equal.

RULE: If a , b , and c are any real numbers and $a = b$, then $ac = bc$.

EX: $3 \cdot 4 = 3 \cdot 4$

Applying this property to equations, when both sides of an equation are multiplied by the same real number, the result is an equivalent equation.

EX: If $\frac{x}{4} = 3$, then $\left(\frac{x}{4}\right) \cdot 4 = 3 \cdot 4$, or $x = 12$

Using the Division Property of Equality

The **Division Property of Equality** states that when equal numbers are divided by the same nonzero number, the quotients are equal.

RULE: If a , b , and c are any real numbers, $c \neq 0$, and $a = b$, then $\frac{a}{c} = \frac{b}{c}$.

EX: $\frac{12}{3} = \frac{12}{3}$

Applying this property to equations, when both sides of an equation are divided by the same nonzero real number, the result is an equivalent equation.

EX: If $7x = 21$, then $\frac{7x}{7} = \frac{21}{7}$, or $x = 3$

Solving Multistep Equations

Some equations require more than one inverse operation to solve. The goal when solving a multistep equation is to isolate the variable (i.e., get it by itself). To do this, use the properties of equality. If there are like terms on one side of an equation, they should be combined before using the properties.

EX: Solve the equation $5x + 3x - 1 = 15$

a. $5x + 3x - 1 = 15$

b. $8x - 1 = 15$

c. $8x - 1 + 1 = 15 + 1$

d. $8x = 16$

e. $\frac{8x}{8} = \frac{16}{8}$

f. $x = 2$

- Original equation
- Combine like terms.
- Use the Addition Property of Equality to isolate the variable and combine like terms.
- Simplify.
- Use the Division Property of Equality to isolate the variable.
- Simplify.

Variables on Both Sides

When an equation has variables on both sides, the objective is to get all variable terms on the same side of the equation by using either the Addition or Subtraction Property of Equality.

EX: Solve the equation $4x - 8 = 2x$

a. $4x - 8 = 2x$

b. $4x - 2x - 8 = 2x - 2x$

c. $4x - 8 = 0$

d. $4x - 8 + 8 = 0 + 8$

e. $4x = 8$

f. $\frac{4x}{4} = \frac{8}{4}$

g. $x = 2$

- Original equation
- Use the Subtraction Property of Equality to move the variable term to one side.
- Simplify.
- Use the Addition Property of Equality to isolate the variable term.
- Simplify.
- Use the Division Property of Equality to isolate the variable.
- Simplify.

Solving Absolute Value Equations

The **absolute value of a number** is its distance from zero on the number line. Therefore, the equation $|x| = 4$ has two solutions, 4 and -4 , since both have a distance of 4 units from zero on the number line.

To solve an equation $|4x| = 8$, where 4 is a positive number, solve the disjunction $x = 2$ or $x = -2$.

EX: Solve the equation $|x + 3| = 3$

a. $|x + 3| = 3$

b. $x + 3 = 3$ or $x + 3 = -3$

c. $x + 3 - 3 = 3 - 3$ or $x + 3 - 3 = -3 - 3$

d. $x = 0$ or $x = -6$ or $x = -10$

- Original equation
- Write a disjunction.
- Use the Subtraction Property of Equality to isolate the variable.
- Simplify.

Solving Inequalities

An **inequality** shows the relationship between two numbers or expressions. The solution of an inequality is the set of numbers that make the inequality true.

Addition & Subtraction Properties

The **Addition and Subtraction Properties of Inequality** state that adding or subtracting the same number on each side of an inequality produces an equivalent inequality. If a , b , and c are real numbers, then the following are true:

- Addition Property of Inequality:** If $a < b$, then $a + c < b + c$; if $a < b$, then $a + c > b + c$.
 - Subtraction Property of Inequality:** If $a < b$, then $a - c < b - c$; if $a < b$, then $a - c > b - c$.
- NOTE: That similar statements hold true for $>$ and \geq .

NUMERIC EXAMPLES

Addition Property of Inequality: Since $4 < 2$, then $4 + 3 < 2 + 3$, since $3 > 0$, then $3 + 4 > 3 + 2$.

Subtraction Property of Inequality: Since $9 > 3$, then $9 - 2 > 3 - 2$, since $4 > 0$, then $4 - 2 > 7 - 2$.

ALGEBRAIC EXAMPLES

Addition Property of Inequality: If $p - 3 < 11$, then $p - 3 + 3 < 11 + 3$, or $p < 14$.

Subtraction Property of Inequality: If $a + 9 > 16$, then $a + 9 - 9 > 16 - 9$, or $a > 7$.

Multiplication & Division Properties

The **Multiplication and Division Properties of Inequality** state that multiplying or dividing each side of an inequality by a positive number makes an equivalent inequality. These properties also state that multiplying or dividing each side of an inequality by a negative number and reversing the direction of the inequality symbol makes an equivalent inequality.

If a , b , and c are real numbers:

If $a < b$, then ac is positive	If $a < b$, then ac is negative
If $c > 0$, then $ac < bc$	If $c < 0$, then $ac > bc$
If $c < 0$, then $ac > bc$	If $c > 0$, then $ac < bc$

NOTE: That similar statements hold true for $>$ and \geq .

NUMERIC EXAMPLES

Multiplication Property of Inequality:

Since $2 < 5$, then $2 \cdot 3 < 5 \cdot 3$, since $3 > 0$, then $2 \cdot (-2) > 5 \cdot (-2)$.

Since $6 > 4$, then $6 \cdot 4 > 4 \cdot 4$, since $4 > 0$, then $4 \cdot (-4) < 6 \cdot (-4)$.

Division Property of Inequality:

Since $4 < 6$, then $\frac{4}{2} < \frac{6}{2}$; since $4 < 6$, then $\frac{4}{-2} > \frac{6}{-2}$.

Since $9 > 3$, then $\frac{9}{3} > \frac{3}{3}$; since $9 > 3$, then $\frac{9}{-3} < \frac{3}{-3}$.

Brief Course In College Algebra

RC Schank

Brief Course In College Algebra:

A Brief Course in College Algebra Walter Burton Ford, 1924 **A Brief Course in College Algebra** Walter B. Ford, 1955 **A Brief** Walter Burton Ford, 2015-06-15 Excerpt from A Brief Course in College Algebra The present book which is intended as a text for use in the freshman year of college or technical school has been prepared with the following considerations particularly in mind 1 In view of the fact that a considerable number of pupils enter college today for whom no knowledge of quadratic equations can be assumed it seems desirable to include a complete treatment of this important topic in the present day college text Two chapters II and III are therefore devoted to quadratic equations the first of which however is altogether elementary and may be omitted at the discretion of the teacher 2 In order to meet the needs and customs of different institutions the various chapters have been made quite independent of each other thus permitting a ready adjustment of the book to either a long course or a short one and affording the teacher the greatest possible flexibility in the choice of topics for any course of given length In this connection the author feels that it should be frankly recognized that today college algebra in most institutions is pursued but a few weeks This makes it impossible to cover a wide range of topics and forces such a selection as may fit best the needs of the particular situation Much may be gained however from a brief but intensive study of a few special topics in algebra at this period of the pupil's career 3 In view of the importance in elementary physics and other applied fields of the subject of variation this topic has been treated somewhat more fully than usual About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *A Brief* Walter Burton Ford, 2017-11-22 Excerpt from A Brief Course in College Algebra Mention may be made of the fact that certain sections of the book have been starred to indicate that they are of minor importance and may be omitted without destroying the continuity of the whole Also in view of the natural overlapping of certain parts of the college course with the more advanced parts of the usual second or advanced course of the high school the author has not hesitated in the treatment of some of the earlier topics such as the progressions variation binomial theorem and logarithms to follow closely the treatment of these same topics to be found in the later pages of the Second Course in Algebra by Ford and Ammerman mac millan the exercises however being changed The author would here express his thanks to Professor E B Lytle of the University of Illinois who read the manuscript and offered valuable suggestions and to Professor J L Markley and Mr R W Barnard of the University of Michigan who assisted in reading the proofs About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com

This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

A Brief Course in College Algebra Walter Burton Ford, 1922 The American Mathematical Monthly, 1929 Includes section Recent publications The United States Catalog Mary Burnham, Carol Hurd, 1928

Mathematical Book Review Index, 1800-1940 Louise S. Grinstein, 1992 This work provides access to approximately 5 000 reviews of English language mathematical books published in North America. Included are works on mathematics, science, philosophy, and education appearing in the periodical literature from 1800 to 1940. It covers materials not reviewed in Book Review Index and Book Review Digest. It predates Mathematical Reviews, which first appeared in 1940. Books on all aspects of mathematics are included. There are subject, reviewer, and title indexes.

Brief Course In College Algebra: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have charmed audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Brief Course In College Algebra : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Brief Course In College Algebra : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.

Brief Course In College Algebra Introduction

Brief Course In College Algebra Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Brief Course In College Algebra Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Brief Course In College Algebra : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Brief Course In College Algebra : Has an extensive collection of digital content, including

books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Brief Course In College Algebra Offers a diverse range of free eBooks across various genres. Brief Course In College Algebra Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Brief Course In College Algebra Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Brief Course In College Algebra, especially related to Brief Course In College Algebra, might be challenging as they're often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Brief Course In College Algebra, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Brief Course In College Algebra books or magazines might include. Look for these in online stores or libraries. Remember that while Brief Course In College Algebra, sharing copyrighted material without permission is not legal. Always ensure you're either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Brief Course In College Algebra eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Brief Course In College Algebra full book, it can give you a taste of the author's writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Brief Course In College Algebra eBooks, including some popular titles.

FAQs About Brief Course In College Algebra Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook's credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What's the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Brief Course In College Algebra is

one of the best book in our library for free trial. We provide copy of Brief Course In College Algebra in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Brief Course In College Algebra. Where to download Brief Course In College Algebra online for free? Are you looking for Brief Course In College Algebra PDF? This is definitely going to save you time and cash in something you should think about.
