*Creative Approaches to Problem Solving* Scott G. Isaksen, K. Brian Dorval, Donald J. Treffinger, 2000 *Advances and New Perspectives in Higher Education Quality* Maria Esteban, Ana B. Bernardo, Ellian Tuero Herrero, Joana R. Casanova, Antonio Cervero, 2024-04-22 The changes that have occurred in today s society require Higher Education to be highly efficient in the academic and professional preparation of young people who enter university For that reason universities around the globe have been advocating in recent years for an improvement in the quality of teaching learning processes As an example the World University Consortium 2023 currently presents among its most urgent and priority objectives the identification of the best evaluative practices of the educational processes that are carried out at

the University as well as the recognition of the actions aimed at improving educational processes based on scientific evidence. In this way it seeks to distinguish all those educational actions that are at the forefront going from actions at the micro level such as individual teaching practices in the classroom such as the application of the flipped classroom or the use of augmented reality up to actions taken at the macro level such as those proposed in the Horizon Europe 2020 strategy.

**Overcoming Inequalities in Schools and Learning Communities: Innovative Education for a New Century** Rocio Garcia-Carrion, Roseli Rodrigues De Mello, Arnetha F. Ball, 2020-03-24 Educational inequalities have strongly impacted disadvantaged and underserved populations such as indigenous Roma migrant children, students with disabilities and those affected by poverty. A wide array of research has contributed to explaining the mechanisms and effects of inequalities in the achievement patterns, dropout rates, disengagement in the school, experiences of children and youth traditionally excluded. Research also suggests the negative consequences for child development including cognitive, language and social-emotional functioning of poverty and lack of quality education in the early years. Consequently, the current unequal access to optimal learning environments for every single child to succeed in education and to have a better life perpetuates the exclusion and neglects their right to education for those minorities. This Research Topic aims at moving beyond causes and shed light upon effective solutions by providing successful pathways for integration and inclusion of the learners most heavily affected. Scholars worldwide are looking for successful actions with children, youth and communities of learners historically underserved to overcome educational and social exclusion. These transformative approaches go beyond the deficit thinking and are grounded in theories, empirical evidence and multidisciplinary interventions oriented towards achieving social impact which refers to the extent to which those actions have contributed to improve a societal challenge. The international network of Schools as Learning Communities is advancing knowledge on deepening and expanding the impact of what has been defined as Successful Educational Actions (SEAs) that is those interventions that improve students' achievement and social cohesion and inclusion in many diverse contexts regardless the socioeconomic, national and cultural environment of schools. Drawing on the evidence generated by this network of researchers to address the global challenge of inequality by studying educational actions oriented towards achieving social impact and potentially transferrable to other contexts, this Research Topic aims at deepening on this approach. In short, our purpose is that the contributions included in this Research Topic contribute to reduce educational and social inequalities and especially benefit those populations most in need.
