Clinical Practice in Adoption Robin Winkler,1988 *Clinical Practice in Adoption* Anthony C. Winkler,Robin C. Winkler,1992-03-01 International Adoption and Clinical Practice Heidi Schwarzwald,Elizabeth Montgomery Collins,Susan Gillespie,Adiaha I. A Spinks-Franklin,2015-03-13 No matter how positive the intent of prospective parents international adoption is fraught with emotional medical administrative linguistic and geopolitical issues And while a wide range of professionals supports adopted children and their families in adjusting to the inherent changes and disruptions the pediatrician s tasks identifying and treating existing health problems and preventing numerous others are particularly complex International Adoption and Clinical Practice equips pediatricians with a comprehensive set of tools for establishing a long term care plan and creating interventions to promote healthy development This concise guide overviews the intricacies of the international adoption process and how they can affect the pediatrician s job from potential pitfalls in collecting medical data from a child s birth country to tracking health concerns into adolescence and young adulthood Developmental and behavioral issues including attachment language acquisition identity development and consequences of abuse and neglect are also examined in this context Figures tables and reference lists complement current information on topics such as Epidemiology and demographics of international adoption Pre adoption evaluation of medical records Guidelines for diagnostic testing screening laboratory evaluations and immunizations Common mental health issues faced by adopted children and their families Long term and adult outcomes of international adoption Relevant policy issues and areas for future study Every child deserves a safe and healthy home and International Adoption and Clinical Practice gives pediatricians an in depth framework for helping to make this possible as children make the transition to a new country and the next stage of their lives Understanding Adoption Diana Siskind,Kathleen Hushion,Susan B. Sherman,2006-08-31 Adoption is a transformational process bringing parenthood to those who long for but cannot bear children and giving stranded children home family and their place in the world But every adoption is preceded and followed by its story and when these stories are told in the offices of psychotherapists we begin to understand the impact of adoption in all its complexity We learn from parents how their quest to have and raise a child has played out in real life and what shadows might have fallen between the dream and the reality And we learn from the children the many ways that being adopted shaped their development their sense of identity what went wrong along the way and how we may help Clinical work with parents and children as well as with adults who were adopted is the focus of Understanding Adoption Because adoption has become widely practiced accepted and accessible and because it has greatly changed the composition of families it is a timely subject for study The authors of this book undertake exploration of this important terrain of loss and connection and of the fragility and resilience of human bonds Clinical and Practice Issues in Adoption Victor Groza,Karen F. Rosenberg,1998 Experts representing practitioners researchers advocates and triad members explore the similarities and differences

between adoptees placed as infants and as older children The book promotes better integration of theory practice policy and research in working with clients who are members of the adoption triad adoptees birth parents and adoptive families For the first time the separate practice areas are bridged pointing out the significant overlap between the two populations and the similar interventions that can be used when working with adoptees regardless of their age at placement Developed as a resource text for practitioners researchers students and adoptive triad members the first chapter provides an overview of the clinical and practice issues Next the work presents issues surrounding infertility and explores identity development with a following chapter on search and reunion issues The fifth chapter discusses adoption support both historically and with current developments and issues The work then examines ethics and offers a model for ethical adoption practice The final chapter explores treatment issues from a family systems perspective
