Progress in Self Psychology, V. 12 Arnold I. Goldberg, 2013-06-17 Volume 12 of the Progress in Self Psychology series begins with reassessments of frustration and responsiveness optimal and otherwise by MacIsaac Bacal and Thomson the Shanes and Doctors The philosophical dimension of self psychology is addressed by Riker who looks at Kohut s bipolar theory of the self and Kriegman who examines the subjectivism objectivism dialectic in self psychology from the standpoint of evolutionary biology Clinical studies focus on self and mutual regulation in relation to therapeutic action countertransference and the curative process and the consequences of the negative selfobject in early character formation A separate section of child studies includes a case study exemplifying a self psychological approach to child therapy and an examination of pathological adaptation to childhood parent loss With a concluding section of richly varied studies in applied self psychology Basic Ideas Reconsidered promises to be basic reading for all students of contemporary self psychology *Progress in Self Psychology, V. 20* William J. Coburn, 2013-07-04 Transformations in Self Psychology highlights the manner in which contemporary self psychology has become in the words of series editor William Coburn a continuing series of revolutions within a revolution Of special note are contributions that explore the bidirectional influences between self psychology and other explanatory paradigms The volume begins with Stern s thoughtful attempt to integrate self psychological and relational perspectives on transference countertransference enactments Fosshage and Munschauer s presentation of a case of extreme nihilism and aversiveness elicits a series of discussions that constructively highlights divergent perspectives on the meaning and role of enactment in treatment and on the so called empathy authenticity dichotomy The productive exploration of theoretical differences also enters in the redefinition of notions of gender and sexuality a topic of increasing interest to self psychologists Differing perspectives which give rise to differing clinical emphases emerge in the exchanges of Clifford and Goldner and of VanDerHeide and Hartmann The special contextualist demands of work with intercultural couples foster a more integrative sensibility with self psychological borrowings from interpretive anthropology and attachment theory Clinical contributors to Volume 20 explore manifestations of a tension that permeates all analytic work that between the patient s

newly emerging ability to expand the self in growth consolidating ways and the countervailing dread to repeat Enlarged by Malin's personal reflections of Fifty Years of Psychoanalysis and by book review essays focusing on the writings of Lachmann and Stolorow respectively Transformations in Self Psychology bespeaks the continuing vitality of contemporary self psychology

**Progress in Self Psychology, V. 16** Arnold I. Goldberg, 2013-06-17 Volume 16 of Progress in Self Psychology How Responsive Should We Be illuminates the continuing tension between Kohut's emphasis on the patient's subjective experience and the post-Kohutian intersubjectivists' concern with the therapist's own subjectivity by focusing on issues of therapeutic posture and degree of therapist activity Teicholz provides an integrative context for examining this tension by discussing affect as the common denominator underlying the analyst's empathy, subjectivity, and authenticity Responses to the tension encompass the stance of intersubjective contextualism, advocacy of active responsiveness, and emphasis on the thoroughgoing bidirectionality of the analytic endeavor Balancing these perspectives are a reprise on Kohut's concept of prolonged empathic immersion and a recasting of the issue of closeness and distance in the analytic relationship in terms of analysis of the tie to the negative selfobject Additional clinical contributions examine severe bulimia and suicidal rage as attempts at self-state regulation and address the self-reparative functions that inhere in the act of dreaming Like previous volumes in the series, volume 16 demonstrates the applicability of self psychology to nonanalytic treatment modalities and clinical populations Here self psychology is brought to bear on psychotherapy with placed children, on work with adults with nonverbal learning disabilities, and on brief therapy Rector's examination of twinship and religious experience Hagman's elucidation of the creative process and Siegel and Topel's experiment with supervision via the internet exemplify the ever-expanding explanatory range of self psychological insights

**Progress in Self Psychology, V. 17** Arnold I. Goldberg, 2013-05-13 Volume 17 of Progress in Self Psychology The Narcissistic Patient Revisited begins with the next installment of Strozier's From the Kohut Archives, first publication of a fragment by Kohut on social class and self formation and of four letters from his final decade Taken together, Hazel Ipp's richly textured Case of Gayle and the commentaries that it elicits amount to a searching reexamination of narcissistic pathology and the therapeutic process This illuminating reprise on the clinical phenomenology Kohut associated with narcissistic personality disorder accounts for the volume title The ability of modern self psychology to integrate central concepts from other theories gains expression in Teicholz's proposal for a two-tiered theory of intersubjectivity in Brownlow's examination of the fear of intimacy and in Garfield's model for the treatment of psychosis The social relevance of self psychology comes to the fore in an examination of the experience of adopted children and an inquiry into the roots of mystical experience, both of which concern the ubiquity of the human longing for an idealized parent imago Among contributions that bring self psychological ideas to bear on the arts, Frank Lachmann's provocative Words and Music, which links the history of music to the history of psychoanalytic thought in the quest for universal substrata of psychological experience, deserves special mention Annette Lachmann's consideration of

empathic failure among the characters in Shakespeare's Othello and Silverstein's reflections on Schubert's self states and selfobject needs in relation to the specific poems set to music in his Lieder round out a collection as richly broad based as the field of self psychology itself

**Self and Systems** Nancy VanDerHeide, William J. Coburn, 2009-04-27 The field of psychoanalytic self psychology has enjoyed a robust and fertile growth since its discovery and elaboration by Heinz Kohut in the 1970's. From its earliest inception self psychology radically changed the face of psychoanalysis and psychotherapy by both introducing novel ways of conceptualizing human development and the process of change and by paving the way for innovative thinking linking the process of therapeutic growth to neuroscience and associated theories. The volume illuminates the major concepts of self psychology and their relevance to the behavioral sciences as well as those whose theories draw on our contemporary understandings of the ways in which brain structure, mind and consciousness interface with one another. Of emphasis is the position of self psychological ideas vis vis behavioral changes, neurobiology, neuropsychology and other neurosciences. **Power Games** Richard Raubolt, 2006-11-17 [www.richardraubolt.com](http://www.richardraubolt.com) An intense account of the misuse of power in psychotherapeutic training that offers solutions to this urgent issue. Over the course of his own training in psychotherapy and psychoanalysis, Richard Raubolt came to see that advanced training is more often than not plagued by authoritarian practices, some subtle and many pronounced. It is the contention of Raubolt and his contributors that these practices instill fear and foster blind obedience to the favored proclivities of the leaders of the training institute. In turn, this subservience which seeps into the therapeutic relationship prevents both the training candidates and their prospective patients from developing creative, authentic and meaningful experiences. This is a book written from the perspective of scholars and experienced clinicians who are acutely aware both on a personal and theoretical level of the disruptive role of power games in psychoanalytic institutes. The collection features a highly nuanced and comprehensively developed psychoanalytic understanding of the use and misuse of power, authority, status and control operating in many traditional and nontraditional training experiences. Finally, new supervisory and training models based on empathy, respect for subjective experiences and democratic principles are proposed as an alternative to the abusive practices so powerfully described in this book.

Lansky,2008 There is a plurality of views in psychoanalysis today and at best such diversity reflects a freedom from domination by any one school of thought a freedom that respects different approaches allowing them to flourish and develop This plurality is well represented in the papers in this volume which were presented at Symposium 2000 The Dream After a Century and take a wide range of stands towards the status of the dream They are first and foremost clinical papers each of which illustrates the author s technical stance toward dreams in the context of that author s own clinical evidence The choices in the handling of the dream made by each clinician reveal implicitly or explicitly the position that clinician takes toward theory and its relation to clinical work The present format allows the reader access to what distinguished practitioners of different psychoanalytic persuasions actually do and also allows for interchange between the authors themselves and the audience at the Symposium about the implications of their presentations Book jacket
