

ALGEBRA FOR BEGINNERS

BASICS

INTRODUCTION TO ALGEBRA

A Puzzle

What is the missing number?

$$\square - 2 = 4$$

OK, the answer is 6, right? Because $6 - 2 = 4$. Easy stuff.

Well, in Algebra we don't use blank boxes, we use a **letter** (usually an x or y , but any letter is fine). So we write:

$$x - 2 = 4$$

It is really that simple. The letter (in this case an x) just means "we don't know this yet", and is often called the **unknown** or the **variable**.

And when we solve it we write:

$$x = 6$$

Why Use a Letter?

Because:

it is easier to write "x" than drawing empty boxes (and easier to say "x" than "the empty box").

if there are several empty boxes (several "unknowns") we can use a different letter for each one.

The ultimate goal of this text is to effectively prepare students to transition to Intermediate Algebra. One of the hallmark characteristics of Beginning Algebra 6 that makes the text easy to learn from is the building block organization. Each section is written to stand on its own and each homework set is completely self testing. Beginning Algebra 6 is a worktext meaning the design is open and friendly with wide margins so you can encourage your students to take notes and work exercises right on the text page. Also with worktexts images visuals are used more frequently to convey the math concept so there are fewer words and less text for the student to read.
