

Beginning Microscope Lab

Objective: To practice using the microscope properly; To properly prepare a wet mount; To observe simple specimens and determine magnification.

Materials:

Compound Microscope

Cover slip

Eyedropper

Small square of newsprint from newspaper containing letter 'e'

Scissors

Microscope slide, clean and dry

Beaker of water

Any of the following:

- hair strand
- insect wing
- fuzzy thread
- prepared slide

Procedure:

1. From the newsprint, cut out a small portion of a word that contains the letter 'e'.
2. Place this in the middle of a clean, dry microscope slide.
3. Using your eyedropper, place 1-2 drops of water on top of the newsprint.
4. Pick up the cover slip, holding it at the edges. While holding the cover slip at an angle, touch one edge of the cover slip to the microscope slide. Carefully lower the cover slip onto the drop of water and let go. It should now be sitting on top of the water and newsprint. You have just made a wet mount.
5. Turn the light of your microscope to the 'on' position.
6. Make sure the stage is lowered and the shortest objective lens (the lowest magnification lens) is in place.
7. Carefully pick up your slide by the edges and place it on the stage of your microscope.
8. Look through the eyepiece, place your hand on the coarse objective knob, and bring the newsprint into focus. Find the letter 'e'.
9. Adjust your slide so that the letter 'e' is in the center of your view.
