Aging A Natural History:

Aging Robert E. Ricklefs, Caleb Ellicott Finch, 1995 The process of aging is familiar to and usually dreaded by all of us We all know what it feels like to grow older but what exactly is aging why does it happen and can anything be done to slow or prevent it An original treatment of human aging that draws on biomedical research and the natural history of animals and plants *Aging A Natural History* describes this biological phenomenon in fascinating detail helping the reader to understand its complex processes In the aging patterns of humans and many other species biologists Robert E Ricklefs and Caleb E Finch find some answers to why aging must exist at all and why it is so spectacularly different in different species The authors ask a variety of compelling questions How can processes that lead to death be such an integral part of life itself Why do some species tend to die at an early age when close relatives may live much longer Why do many species age when others seem not to And perhaps most importantly why is aging which is so detrimental to the individual maintained by natural selection Finally the authors consider the prospects for prolonging human life and improving the quality of life at older ages Concluding that aging is induced both by environmental factors and by the biochemical processes normally present in all cells they show aging to be an inevitable yet alterable part of life a natural process that may limit activity but is not necessarily debilitating

Aging in World History David G. Troyansky, 2015-10-05 In *Aging in World History* David G Troyansky presents the first global history of aging At a time when demographic aging has become a source of worldwide concern and more people are reaching an advanced age than ever before the history of old age helps us understand how we arrived at the treatment of aging in the modern world This concise volume expands that history beyond the West to show how attitudes toward aging the experiences of the aged and relevant demographic patterns have varied and coalesced over time and across the world From the ancient world to the present this book introduces students and general readers to the history of aging on two levels the experience of individual men and women and the transformation of populations With its attention to cultural traditions medicalization decades of historical scholarship and current gerontology *Aging in World History* is the perfect starting point for an exploration of this increasingly universal aspect of human experience *Natural History*, 2001 **Research Awards Index**, 1978 **Natural History Miscellanea**, 1954 **Science**, 1925 Vols for 1911 13 contain the Proceedings of the Helminthological Society of Washington ISSN 0018 0120 1st 15th meeting Biennial Report of the State Historical and Natural History Society of Colorado State Historical and Natural History Society of Colorado, 1908 **Biomedical Index to PHS-supported Research: pt.
