Clinical Education in Geriatrics Judith L. Howe, Thomas V. Caprio, 2020-05-21 This book highlights both recent innovations in professional health curricula and continuing education and interventions aimed at improving student attitudes towards geriatrics and aging The contributors cover areas including simulation online training and standardized patients for evaluation but also emphasize the important end result of clinical

training to take care of real older adults outside the classroom. Importantly, this underscores the development of powerful learning experiences of students by sensitizing them to the frameworks of palliative care, cancer care, sexuality, and aging research, all of which serves as a powerful catalyst for creating a pipeline of students who embrace aging as a central theme of their future work. As increased training in geriatrics is required to attune the health care workforce to the needs of older adults, this book will be of interest to those seeking to create a more age-friendly healthcare curriculum. This book was originally published as a special issue of the Gerontology Geriatrics Education journal. Advances in Physical Ergonomics and Human Factors Ravindra S. Goonetilleke, Waldemar Karwowski, 2019-06-01. This book reports on the state of the art in physical ergonomics and addresses the design of products, processes, services, and work systems to ensure they are productive, safe, and enjoyable for people to use. The human body's responses to physical and physiological work demands, strain, injuries from repetition, vibration, force, and posture are the most common types of issues examined, along with their design implications. The book explores a wide range of topics in physical ergonomics, including the consequences of repetitive motion, materials handling, workplace safety, the usability of portable devices, design, working postures, and the work environment. Mastering physical ergonomics and safety engineering concepts is fundamental to creating products and systems that people can safely and conveniently use, as well as avoiding stresses and minimizing the risk of accidents. Based on the AHFE 2019 Conference on Physical Ergonomics and Human Factors held on July 24-28, 2019, in Washington, D.C., USA, this book provides readers with a comprehensive perspective on the current challenges in physical ergonomics, which is a critical aspect in the design of any human-centered technological system and for factors influencing human performance.
