Age Friendly Lawrence R. Samuel, 2021-09-21 Age Friendly Ending Ageism in America is a rallying call to make the United States a more equitable and just nation in terms of age Age friendliness means being inclusive towards older people as workers consumers and citizens something that can t be said to exist today The United States and especially Big Business are notoriously age unfriendly places a result of our obsession with youth Virtually all aspects of everyday life in America will be impacted by the doubling or tripling of the number of older people over the next two decades more reason to adopt age friendliness as a cause Age Friendly shows how large companies are in an ideal position to address the aging of America and in the process benefit from making their organizations more age friendly Because of its economic power and commitment to diversity in the workplace Big Business specifically the Fortune 1000 has the opportunity and responsibility to take a leadership role in changing the narrative of aging in America The book shows that age friendliness offers the possibility of bridging gaps not just between younger and older people but those based on income class race gender politics and geography More than anything else Age Friendly presents a bold and counterintuitive idea aging is a positive thing for businesses individuals and society as a whole and we should embrace it rather than fear it While ageism is a pervasive force in America that like racism and gender discrimination runs contrary to our democratic ideals there is some good news An age friendly movement is spreading in America and around the world as a growing number of cities and towns strive to better meet the needs of their older residents As well a concerted effort is being made to convince Big Business that an intergenerational workforce is in the best interests of not just

older employees but the companies themselves Age brings experience perspective and wisdom just the right skill set for both short and long term decision making The aging of America also presents major implications for businesses in terms of marketing to older consumers Baby boomers are still the key to the economy despite marketers focus on youth much in part to their collective wealth and propensity to consume Age friendly marketing thus makes much sense due to the longevity economy i e the billions of dollars that older consumers spend each year and the goldmine that looms in the future as they become an even bigger percentage of the population Finally Age Friendly discusses how more corporations are pursuing social responsibility in addition to maximizing profits an ideal opportunity for corporations to demonstrate good citizenship by supporting age friendliness on a local state or national level

Aging in Minority Groups R. L. McNeely, John N. Colen, 1983-07 Older members of minority groups are discriminated against not only because they are old but because of their ethnic group Perhaps for this reason studies of older people in minorities have tended to approach the subject as a social problem This volume of essays written by minority group contributors takes a more positive view The contributions focus on how normal members of minorities cope with the problems of being old These normative patterns the demographics of older minority group members and issues of service delivery and policy are examined

Growing Young Ashley Montagu, 1981 In this new revised edition of his landmark book Montagu compels us to reevaluate the way we think about growth and development in all its phases throughout life Humans are designed to grow and develop their childlike qualities and not to become the ossified adults prescribed by society Montagu demonstrates how our culture schools and families are in conspiracy against such childlike traits as the need to love to learn to wonder to know to explore to think to experiment to be imaginative creative and curious to sing dance or play He also reveals the many links between physical and mental aging and tells how to prevent psychosclerosis the hardening of the mind so that we can die young as late as possible The best statement ever written on the most important neglected theme of human life and evolution
