Aids Caregiving Lessons For Second Decade:

AIDS Caregiving Charles Garfield, 1993-10 All of us who have been involved with AIDS caregiving during the past decade share common challenges multiple losses and accumulated grief compassion fatigue relentless uncertainty maintaining our sense of hope and more As we listen to the voices of men and women at the front lines of the epidemic talk candidly about the risks and rewards of supporting someone with HIV disease the wisdom and courage we need to keep caring in the second decade can be found Through intimate stories shared with Charles Garfield we are provided with a guide to discovering how to be tough on problems and tender on people These tapes show us how to truly be present for and make a difference to a person with HIV AIDS *American Public Opinion and Health Care* Robert Blendon, 2011 This reference brings together findings from more than 200 national opinion surveys conducted by the Kaiser Family Foundation Harvard University's School of Public Health and other institutes and polling and media organizations *Public Financing and Delivery of HIV/AIDS Care* Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on the Public Financing and Delivery of HIV Care, 2005-11-04 Each year it is estimated that approximately 40 000 people in the U S are newly infected with HIV In the late 1990s the number of deaths from AIDS dropped 43% as a result of highly active antiretroviral therapy Unfortunately the complex system currently in place for financing and delivering publicly financed HIV care undermines the significant advances that have been made in the development of new technologies to treat it Many HIV patients experience delays in access to other services that would support adhering to treatment As a result each year opportunities are missed that could reduce the mortality morbidity and disability suffered by individuals with HIV infections *Public Financing and Delivery of HIV/AIDS Care* examines the current standard of care for HIV patients and assesses the extent the system currently used for financing and delivering care allows individuals with HIV to actually receive it The book recommends an expanded federal program for the treatment of individuals with HIV administered at the state level This program would provide timely access and consistent benefits with a strong focus on comprehensive and continuous care and access to antiretroviral therapy It could help improve the quality of life of HIV/AIDS patients as well as reduce the number of deaths among those infected
