students to learn the concepts coming up in the chapter Also new to this edition are the two academic mindset topics of developing a growth mindset and developing grit The power no pun intended of the Internet is that it allows us to enhance the learning and teaching experience for students and instructors We can do things that we couldn t dream of even 10 years ago That s where Nathalie Vega Rhodes comes in A long time P O W E R math textbook user and outstanding instructor Nathalie has a lot of experience using digital tools Better yet she and Sherri have the same philosophy of teaching love for students and belief in addressing all of their students needs in the classroom What makes P O W E R a unique tool for the classroom A major challenge in developmental courses is that students at this level struggle with basic study skills and habits Maybe this is one of their first college courses or perhaps they are adults returning to school after a long absence Either way many of the individuals taking this course don t know how to be good students Instructors often don t have the time the resources or the expertise to teach success skills AND the math concepts The P O W E R Learning Framework was developed by successful author psychologist student success instructor and researcher Bob Feldman It is a method of accomplishing any task using five simple and consistent steps Prepare Organize Work Evaluate Rethink The P O W E R framework that Math instructors have come to know and love is at the core of each section and new study strategies and exercises have been integrated with every chapter better help students successfully learn math concepts while at the same time developing habits that will serve them well throughout their college careers and in their daily lives The conversational writing style practical applications innovative student resources and expanded available in ALEKS makes this an appealing and very teachable option for faculty
