Energy, the Modern State, and the American World System George A. Gonzalez,2018-03-01 In this provocative and original study George A Gonzalez argues that the relationship between energy and the state as well as global politics has become more and more deeply intertwined reaching something of a crescendo with the global hegemony of Pax Americana in the twentieth and early twenty first centuries He presents a clear and concise case for viewing the modern state as the collaborative and affirmative union of capitalism and political authority in a setting where energy resources be it wind coal or

oil provide the basis for the relatively inexpensive projection of political power More broadly energy serves as the foundation of the modern economy and because of this a prime function of the modern state is ensuring access to cheap reliable sources to power and grow the economy Historically energy is more of a zero sum resource than capital markets labor or technology and thus is a greater source of geopolitical tension and violence Energy politics and by extension international politics is moreover shaped by domestic corporate elites especially those within the United States

Energy and the Politics of the North Atlantic George A. Gonzalez,2013-01-01 Documents how energy resource acquisition has been the driving motivator for European and American international relations

Energy and Empire George A. Gonzalez,2012-09-07 What set the United States on the path to developing commercial nuclear energy in the 1950s and what led to the seeming demise of that industry in the late 1970s Why in spite of the depletion of fossil fuels and the obvious dangers of global warming has the United States moved so slowly toward adopting alternatives In *Energy and Empire* George A Gonzalez presents a clear and concise argument demonstrating that economic elites tied their advocacy of the nuclear energy option to post 1945 American foreign policy goals At the same time these elites opposed government support for other forms of energy such as solar that cannot be dominated by one nation While researchers have blamed safety concerns and other factors as helping to arrest the expansion of domestic nuclear power plant construction Gonzalez points to an entirely different set of motivations stemming from the loss of America s domination control of the enrichment of nuclear fuel Once foreign countries could enrich their own fuel civilian nuclear power ceased to be a lever the United States could use to economically politically dominate other nations Instead it became a major concern relating to nuclear weapons proliferation

Strategic Studies Quarterly ,2007

Yearbook of European Environmental Law ,2008 Degrees that Matter Ann Rappaport,Sarah Hammond Creighton,2007 Universities and colleges are in a unique position to take a leadership role on global warming As communities they can strategize and organize effective action As laboratories for learning and centers of research they can reduce their own emissions of greenhouse gases educate students about global warming and direct scholarly attention to issues related to climate change and energy This book offers practical guidance for those who want to harness the power of universities and other institutions and provides perspectives on how to motivate change and inspire action within complex organizations
