Rotch,2015-08-05 Excerpt from *The Conquest of the Air Or the Advent of Aerial Navigation* The final conquest of the air by  
man finds no popular and at the same time scientific account in English of its accomplishment While the rapid progress  
which is daily being made in aerial navigation necessarily renders any permanent record of the latest achievements  
impossible yet the epoch when mechanical flight was demonstrated to the world seems opportune to chronicle the past and  
present status of the art and to forecast its future The physical conditions which prevail in the ocean of air being even more  
important to the aeronaut than the conditions on bodies of water are to the sailor a knowledge of the former is of vital  
interest Accordingly it appeared appropriate that at the outset there should be given a description of the ocean above our  
heads including the surveys and soundings which have been executed by the author during the past twenty years at his own  
observatory About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at
