Lake Michigan's Aircraft

Carriers Paul M. Somers, 2003 Lake Michigan's Aircraft Carriers is the story of the USS Wolverine and the USS Sable two Great Lakes excursion ships converted for use as aircraft carrier training during World War II Through the duration of the war the United States Navy qualified 17 800 pilots for aircraft carrier operation Training the pilots on either the Atlantic or the Pacific Ocean would have exposed the training ships to the danger of submarine attack while requiring the escort of fighting ships that were needed elsewhere It would also have involved arming and armoring the ships used for training Commander R F Whitehead came up with an idea that solved all of these problems He suggested doing the training on the protected waters of the Great Lakes The USS Wolverine and the USS Sable were chosen and thus became the only fresh water paddle wheeled coal fired aircraft carriers in the history of the world Author Paul M Somers shares his collection of vintage photos and a lifetime of research to detail the history of these two great vessels from their life as cruise ships to their contributions to the war effort and then to their eventual scrapping

Submarine Aircraft Carriers

Jacob Gunnarson, Norman Polmar, 2025-12-16 Two innovations in weaponry appeared at the beginning of the twentieth century and revolutionized warfare turning it into a multidimensional contest the modern diesel powered submarine and the fixed wing aircraft Both saw extensive use during World War I and the nations of the world soon developed mobile launching pads for planes during and after the war first using surface ships and then submarines The submarine aircraft carrier was born Virtually nothing has been written about these weapons until now in this detailed narrative by one of the world's leading naval experts Submarine aircraft carriers were pursued by all of the world's major naval powers the United States Great Britain Germany France Italy Japan and the Soviet Union Germany led the way and while its efforts did not put vessels into battle during World War I rumors of such a submarine caused widespread panic in New York City in 1918 Despite concentrated efforts during the 1920s and 1930s only Japan and France had seagoing submarine aircraft carriers when World War II erupted France's single such vessel disappeared at sea in 1942 but Japan built forty seven including three of its massive I 400 class the largest submarines of World War II Japanese submarine aircraft carriers launched the only aerial bombing of the contiguous United States when a sub based plane dropped bombs over Oregon The three I 400s figured prominently in Japan's never realized plans to attack the Panama Canal New York City and Washington DC as well as in Operation Cherry Blossoms at Night Japan's last ditch plan to spread bubonic plague and other pathogens to the coastal cities of California After World War II both the United States and the Soviet Union pursued further development of submarine aircraft carriers as part of their nuclear strike capabilities including some fanciful ideas for truly gigantic submarines launching bomber aircraft but the advent of guided cruise missiles quickly ended interest in these vessels In this comprehensive and readable history Jacob Gunnarson and Norman Polmar draws on more than sixty years of researching and writing about the world's naval vessels to uncover the development of submarine aircraft carriers Their story reveals

much about twentieth century naval strategy tactics and technology **US Navy Aircraft Carriers 1922-45** Mark Stille,2012-05-20 This book covers the design development and operation of USN aircraft carriers built prior to World War II including their aircraft and weaponry **US Cold War Aircraft Carriers** Brad Elward,2014-03-20 An in depth look at the first US super carriers from the design and development of the Forrestal Kitty Hawk and Enterprise classes to their operational history during the Cold War and beyond **Life on an Aircraft Carrier** Heather Moore Niver,2013-01-01 Aircraft carriers are truly impressive cities at sea Their monstrous size alone can fill visitors with awe However the people who live on carriers and the jobs they do every day are just as extraordinary Pilots who land jets with precision engineers who piece together weapons and technicians who fuel vehicles in the midst of dangerous situations are just some of the heroes of the navy highlighted in this book **Nimitz-Class Aircraft Carriers** Brad Elward,2011-03-15 An up to date history of one of the most spectacular feats of naval engineering the nuclear powered Nimitz class aircraft carriers **The Incredible Story of Aircraft Carriers** Greg Roza,2003-12-15 This book tells the exciting story of the evolution of carriers such as the USS Enterprise and how these floating airports proved that they were key to winning a war far away from home Students will learn about specific areas on a carrier including the flight deck and air wing the control tower and the lower decks They will even learn how supercarriers are constructed Leveraging America's Aircraft Carrier Capabilities John Gordon,2006 As the United States seeks ways to stretch its defense dollars pursue the Global War on Terrorism and meet other national security challenges it is highly likely that policymakers will increase their reliance on aircraft carriers using them more often and in more situations than they have in the past especially if the vessels have the additional capabilities to respond appropriately The current and expected use of aircraft carriers led the United States Navy in fall 2004 to commission RAND to explore new and nontraditional ways that the United States might be able to employ aircraft carriers in pursuit of traditional and emerging military and homeland defense missions Over six months RAND created and convened two Concept Options Groups COGs small groups of experienced military and civilian experts defense analysts and potential users who work together to identify promising ways to employ military might in nontraditional ways to explore possible nontraditional roles for aircraft carriers One COG explored and identified new ways that aircraft carriers could be used in combat operations the second COG examined ways that the vessels could be used in noncombat homeland security missions or to help the nation recover from terrorist attacks or natural disasters in U S territories Among the combat recommendations to come from the COG insights are that abilities need to be enhanced to reconfigure carrier air wings among noncombat recommendations are that the availability of nonready carriers to respond to unforeseen crises needs to be improved This monograph summarizes the activities findings and recommendations of both carrier COGs It should be of special interest to the Navy and to uniformed and civilian decisionmakers with responsibilities related to naval and carrier operations maritime domain awareness or homeland security *CVAN-70 Aircraft Carrier* United States.
