A Dictionary of Chemistry and the Allied Branches of Other Sciences Henry Watts, 1879 **A Dictionary of Chemistry**
Henry Watts, 1872 **A Dictionary of Applied Physics** Richard Glazebrook, 1922 The Pocket Oxford Dictionary of
Current English Henry Watson Fowler, 1928 *A dictionary of chemistry. (Second, Third suppl.).* Henry Watts, 1872 A
dictionary of chemistry and the allied branches of other sciences Henry Watts (F.C.S.), 1879 **The Language of Colour in**
the Bible Lourdes García Ureña, Emanuela Valeriani, Anna Angelini, Carlos Santos Carretero, Marina Salvador
Gimeno, 2022-04-19 The Bible is one of the books that has aroused the most interest throughout history to the present day
However there is one topic that has mostly been neglected and which today constitutes one of the most emblematic elements
of the visual culture in which we live immersed the language of colour Colour is present in the biblical text from its beginning
to its end but it has hardly been studied and we appear to have forgotten that the detailed study of the colour terms in the
Bible is essential to understanding the use and symbolism that the language of colour has acquired in the literature that has
forged European culture and art The objective of the present study is to provide the modern reader with the meaning of
colour terms of the lexical families related to the green tonality in order to determine whether they denote only color and if
so what is the coloration expressed or whether together with the chromatic denotation another reality inseparable from
colour underlies along with the chromatic denotation there is another underlying reality that is inseparable from colour We
will study the symbolism that which underpins some of these colour terms and which European culture has inherited This
lexicographical study requires a methodology that allows us to approach colour not in accordance with our modern and
abstract concept of colour but with the concept of the ancient civilisations This is why the concept of colour that emerges from
each of the versions of the Bible is studied and compared with that found in theoretical reflection in both Greek and Latin
Colour thus emerges as a concrete reality visible on the surface of objects reflecting in many cases not an intrinsic quality
but their state This concept has a reflection in the biblical languages since the terms of colour always describe an entity in
this sense one can say that they are embodied and include within them a wide chromatic spectrum that is they are mostly
polysemic Structuralism through the componential analysis although providing interesting contributions had at the same
time serious shortcomings when it came to the study of colour These were addressed through the theoretical framework
provided by cognitive linguistics and some of its tools such as cognitive domains metonymy and metaphor Our study then is
one of the first to apply some of the contributions of cognitive linguistics to lexicography in general and particularly with
reference to the Hebrew Greek and Latin versions of the Bible A further novel contribution of this research is that the
meaning is expressed through a definition and not through a list of possible colour terms as happens in dictionaries or in
studies referring to colour in antiquity The definition allows us to delve deeper and discover new nuances that enrich the
understanding of colour in the three great civilizations involved in our study Israel Greece and Rome **A Smaller**
