**Combating Proliferation** Jason D. Ellis, Geoffrey D. Kiefer, 2007-02-23 Selected by Choice Magazine as an Outstanding Academic Title The intelligence community's flawed assessment of Iraq's weapons systems and the Bush administration's decision to go to war in part based on those assessments illustrates the political and policy challenges of combating the proliferation of weapons of mass destruction In this comprehensive assessment defense policy specialists Jason Ellis and Geoffrey Kiefer find disturbing trends in both the collection and analysis of intelligence and in its use in the development and implementation of security policy Analyzing a broad range of recent case studies Pakistan's development of nuclear weapons North Korea's defiance of U N watchdogs Russia's transfer of nuclear and missile technology to Iran and China's to Pakistan the Soviet biological warfare program weapons inspections in Iraq and others the authors find that intelligence collection and analysis relating to WMD proliferation are becoming more difficult that policy toward rogue states and regional allies requires difficult tradeoffs and that using military action to fight nuclear proliferation presents intractable operational challenges Ellis and Kiefer reveal that decisions to use or overlook intelligence are often made for starkly political reasons They document the Bush administration's policy shift from nonproliferation which emphasizes diplomatic tools such as sanctions and demarches to counterproliferation which at times employs interventionist and preemptive actions They conclude with cogent recommendations for intelligence services and policy makers

Global Anti-Money Laundering Regulation Nkechikwu Azinge-Egbiri, Nicholas Ryder, Ehi Eric Esoimeme, 2024-11-25 This book explores the politics of money laundering and terrorist financing ML TF regulation in several countries across Africa and the Small Island States Developed countries created the Financial Action Task Force FATF to combat ML TF globally Expectedly the FATF's standards mirror existing banking regulations within the G7 countries Yet the standards apply to all countries irrespective of the limited ML TF risks they pose to the global economy their weak pre conditions for effective regulation and their non involvement in the FATF's framing Still such countries mainly within the Global South have worked hard to amplify their compliance with the regime due to fears of the repercussions of their non compliance This collection demonstrates how the global ML TF regulation is

treated as an implicitly superior legal regime where the Global South must comply irrespective of their perception of the FATF's legitimacy challenges. It shows that beyond exogenous factors such as neo-colonialism, endogenous factors such as weak institutions and corruption undermine the compliance trajectory of the Global South. Furthermore, it analyses the unintended consequences of transplanting FATF standards into diverse legal and cultural contexts. The volume contributes to our understanding of the challenges of transplantation from the Global North and how the Global South is steering within the constraints created by the FATF. It advocates for a comprehensive understanding of the nuanced compliance challenges of developing countries. It further proposes practical solutions to address them, emphasizing the importance of risk-based understanding, accountability, capacity building, and coordination in achieving effective anti-money laundering and counter-terrorist financing measures. The collection will be essential reading for researchers, academics, and policy makers working in financial crime regulation and international economic law.

**Combating Proliferation** Jason D. Ellis, Geoffrey D. Kiefer, 2004-09-20. The intelligence community's flawed assessment of Iraq's weapons systems and the Bush administration's decision to go to war in part based on those assessments illustrates the political and policy challenges of combating the proliferation of weapons of mass destruction. Examining a broad range of recent case studies among them Pakistan's development of nuclear weapons, North Korea's defiance of UN watchdogs, and Russia's transfer of nuclear and missile technology to Iran and China's to Pakistan, defense policy specialists Jason Ellis and Geoffrey Kiefer find disturbing trends in both the collection and analysis of intelligence and in its use in the development and implementation of security policy.

Combating Proliferation of Weapons of Mass Destruction United States. Commission to Assess the Organization of the Federal Government to Combat the Proliferation of Weapons of Mass Destruction, 1999. *Combating Terrorism in the Environmental Trenches*, 2003. Fighting Proliferation Air University (U.S.). Press, 1996. The authors of this collection of essays examine such issues as devising effective strategy against the proliferation of nuclear weapons, coping with the spread of space technology, and curbing Iran's and North Korea's strategic programs. The contributors address these challenges and their implications for US policy in the book's five divisions. Part 1 explores how best to reform existing nonproliferation efforts. Part 2 considers new high-leverage systems likely to threaten the US in the near future. Parts 3 and 4 focus on two new truculent proliferators, North Korea and Iran. Part 5 discusses the need to develop a long-term diplomatic, political, economic, and military strategy against proliferation. *Fighting Proliferation* places itself in the mainstream of opposition to proliferation and the search for practical, policy-relevant approaches to dealing with it. Improving Anti-drug Budgeting Patrick Murphy, 2000. This text explores how anti-drug budgeting in the USA can be improved. It argues that although the drug control budget will always be a collection of estimates, it can be significantly improved by establishing common principles to guide the calculations and by basing them on empirical data. *Connections*, 2007.
