Preventing Irreparable Harm Eva R. Rieter, 2010 International human rights adjudicators while facing urgent cases have used provisional measures in order to prevent irreparable harm e g to order States to halt an expulsion the execution of a death sentence destruction of the natural habitat or to ensure access to health care in detention or protection against death threats In the practice of the various adjudicators the traditional concept of provisional measures has undergone a process of

humanisation This book addresses the question how such provisional measures can be made as persuasive as possible Apart from the Inter American Court none of the human rights adjudicators motivate or publish their provisional measures Yet this book analyses their best practices and obstacles determines the underlying rationale for their use of provisional measures and establishes the core of the concept of provisional measures that all adjudicators have in common It argues that clarity on what belongs to the core of the concept and on what does not belong to the concept at all enhances the persuasive force of provisional measures The practices of the international adjudicators made accessible in this book may prove useful in the ongoing cross fertilization occurring among these adjudicators Moreover the analysis provided allows individual victims their counsel NGOs as well as international institutions to address more effectively urgent human rights cases About this book Rieter s book is a very worthwhile and sorely needed reference Overall the book provides a comprehensive and organized explanation of provisional measures and the bodies that may issue them Its most important contribution is found in the middle chapters addressing the various situations and kinds of harm previously addressed by human rights tribunals when granting provisional measures although the practical suggestions to human rights tribunals are also surely welcome Researchers human rights defenders and the tribunals themselves will find much in Rieter s volume to strengthen and enrich their work Ideally the information it contains will contribute not only to better understanding of provisional measures but also to coherence in and progressive development of this area of the law X on internationalhumanrightslaw org 2010
