

Annotated Bibliographies

Available online at: <https://sfs.ca/asc/student-resources/>

An annotated bibliography is a list of fully referenced sources that includes short summaries and, often, evaluations of each of the cited work's relevance to the writer's overall project. A variety of disciplines use annotated bibliographies for a variety of reasons. Most commonly, they are used to demonstrate the breadth of writing on a particular topic, issue or field of study. A typical annotated bibliography assignment in Political Science, for instance, might be to find ten scholarly sources (books or articles) on the electoral system in Canada and summarize each source. A more extensive annotation project could involve amassing all the sources available in an entire field of study. Such an annotated bibliography could include hundreds of citations and be book length.

Whether ten or 110 sources long, all annotated bibliographies have the same general purpose: to offer the reader a complete description of a work's location and contents. In order to achieve this, each annotation will include these two elements:

- a complete *citation* of each source according to the documentation style demanded in the discipline
- a thorough yet brief summary or evaluation of the source, usually called an *annotation*

Citation

The citation for each work will be determined by the documentation style (such as APA or MLA) that you are asked to use. Arranging the information within the citation is a rather mechanical process that involves the proper placement of publishing data and punctuation. To build excellent citations, however, is to be thorough and consistent. Once completed, most short annotated bibliographies arrange their individual sources alphabetically; longer ones may group smaller alphabetized citations according to thematic divisions.

Annotation

To annotate is to be *relevant* and *brief* at the same time. The annotation must be relevant because your reader wants to know the significance of the work to your goal as a researcher. However, the brevity required in most annotated bibliographies (usually less than 100 words) demands a degree of "accurate generalization" that can test a writer's summarizing skills.

Beyond exhausting the scope of the work, the contents of the annotation can vary. Some annotations will include the work's purpose or governing argument/ thesis; others will include the work's purpose or governing argument/ thesis; others will also include the main topics covered, the author's approach, and (if important) the methodology used in the study.
